

**AC-1: Academic Courses**  
**United World College-USA**

| <b>Groups/Departments</b>                 | <b>Courses</b>                                | <b>Sustainability Status</b>  |
|---|---|---|
| Group 1: Language Acquisition             | English A HL/SL                               | No  |
|   | Spanish A HL/SL                               | No  |
|   | Literature & Performance SL                   | No  |
|   | Mother Tongue School-Supported Self-Taught SL | No  |
|   | English B HL/SL                               | No  |
| Group 2: Studies in Language & Literature | French B HL/SL                                | No  |
|   | Spanish B HL/SL                               | No  |
|   | French Ab Initio SL                           | No  |
|   | Spanish Ab Initio SL                          | No  |
|   | Italian Ab Initio SL                          | No  |
| Group 3: Individuals & Societies          | Economics HL/SL                               | No  |
|   | Global Politics HL/SL                         | Sustainability-Inclusive: Within the unit on development, the course explores sustainability as a key concept. As the course is about politics, it focuses on the political debates surrounding sustainability on a policy level with respect to local and national governments, as well as the UN's view of sustainable development through its Sustainable Development Goals. |
|   | History HL/SL                                 | No  |
|   | Social & Cultural Anthropology HL/SL          | No  |
|   | Biology HL                                    | No  |

|                      |   |   |
|----------------------|---|---|
| Group 4: Sciences    | Chemistry HL/SL                         | No  |
|                      | Environmental Systems & Society SL      | Sustainability-Focused: The entire course is about the dynamic interconnections between humans and environmental systems at a variety of different scales with sustainability being a key foundational concept.   |
|                      | Physics HL/SL                           | Sustainability-Inclusive: The course has a unit on Energy Production, during which they discuss primary energy sources, renewable and non-renewable energy sources, electricity as a versatile and secondary source of energy, the specific energy and energy density of different fuel sources, and the sustainability challenge of shifting from non-renewable to renewable energy sources. |
|                      | Sports, Exercise & Health Science HL/SL | No  |
| Group 5: Mathematics | Mathematics HL/SL                       | No  |
| Group 6: The Arts    | Dance HL/SL                             | No  |
|                      | Music HL/SL                             | No  |
|                      | Visual Arts HL/SL                       | No  |
| Theory of Knowledge  | Theory of Knowledge                     | No  |
