STARS IN-48: Innovation B
Letter of Affirmation
Pre-Submission Review
November 2, 2021

To Whom it May Concern:

Brandon Morton (Assistant Director of Sustainability, Operations) and I collaborated on developing a GHG Peer Review Methodology for Higher Education Institutions. This process, and the subsequent review of Dallas College's GHG inventory is outlined in AASHE STARS Credit IN-18: Innovation B. Using the UN Protocol for GHG Peer Review (2017) as a model of best practices, I analyzed Dallas College's GHG inventory using the TACCC approach (Transparency, Accuracy, Completeness, Comparability, and Consistency).

The additional documentation included in Credit IN-18 outlines the review period, inventory files that were provided to the reviewer, a confidentiality agreement, and my review of the GHG inventory by each Source and Sink category. I can attest that Dallas College responded to each of my comments and adjusted the inventory to account for all inconsistencies and errors.

Please feel free to contact me at Kathleen.Klaniecki@cwu.edu or 509-963-1825 if you require any additional information.

Sincerely,

Kathleen Klaniecki
