Approved Executive Order 4 Specifications

GREEN PURCHASING REQUIREMENTS

State agencies and authorities are required to purchase commodities, services, and technology that meet the approved green procurement specifications.

Executive Order 4, Establishing a State Green Procurement and Agency Sustainability Program, established the creation of green procurement lists and specifications of commodities, services, and technology for use by state agencies during a procurement. The specifications identify product criteria that will:

- Reduce or eliminate the health and environmental risks from the use or release of toxic substances;
- Minimize the risks of the discharge of pollutants into the environment;

- Minimize the volume and toxicity of packaging;
- Maximize the use of recycled content and sustainably managed renewable resources; and
- Provide other environmental and health benefits.
