### 1. Projects Proposal Context « Mon projet DD 2023 »

Ambitious to effectively contribute to the implementation of the Sustainable Development Goals (SDGs), the UM6P Sustainable Development Department is launching a **projects proposal 2023 dedicated** to the UM6P community.

This projects proposal, entitled "Mon projet DD 2023", is part of UM6P's desire to set in motion a Sustainable Development approach and to mobilize its entire community (students, teachers, researchers and administrative staff) in order to integrate or strengthen Sustainable Development in our Training, Research and Operations missions.

### 2. Projects Proposal Objectives « Mon projet DD »

The main goal of this projects proposal is to encourage UM6P community (students, teachers, researchers and administrative staff) to suggest SD projects, challenge themselves during their implementation, appeal to their creativity and their imagination, engage them to initiate real and concrete actions, show them that it is possible to manage differently and to develop alternatives by integrating all the aspects of sustainable development.

### 3. What type of project can we submit?

The project must have a clear impact and have as its main goal to meet a real-existing local need or challenge. It must incorporate the pillars of sustainable development during its creation and implementation. This project must be:

- **Socially fair**, which means that it respects people and contributes to the well-being of all the actors involved;
- **Environmentally sustainable**, i.e. it is neutral or positive in terms of its environmental impact;
- **Economically viable**, which means that its possible profits are used to develop the project or are intended for a social or solidarity project;
- **Managed in a participatory, democratic and autonomous approach**.
