

Backcountry Biology

Love camping and the outdoors?

Want a hands-on outdoor learning experience?

Intersession 2020 (May 19 – June 5)

Biology 128 – Natural History of Selected Areas (3 credits)

Biology 226 – Field Biology (3 credits)

These courses will take you outside the classroom and into nature where we will explore the region's ecosystems, native species, and the influence glaciation has had in shaping Northern Illinois and Wisconsin. The courses mix indoor and outdoor instruction at CLC and local forest preserves, and will culminate in a 3-night backpacking trip along the Ice Age Trail in Northern Wisconsin. Cost is tuition (6 credits) plus \$150. Sound interesting?
