RE: Sustainability Tracking, Assessment and Rating System
College of Lake County Submission

Dear STARS Team:

The College of Lake County (CLC) is happy to re-submit its 2020 STARS report. CLC has identified sustainability as one of its strategic areas of excellence and is committed to promoting sustainability practices college-wide. CLC's commitment to sustainability goes back beyond its participation in the pilot STARS program and Presidents' Climate Commitment in 2009. The College identifies and tracks progress in sustainability goals in the CLC Sustainability Plan and Annual Performance Report.

The College is proud to have been listed in the Association for the Advancement of Sustainability in Higher Education's (AASHE) Sustainable Campus Index as being in the Top 10 associate's level colleges for the past three years. We look forward to future submissions that reflect the great strides still being taken to enhance sustainability initiatives across the College's campuses, curricula, and community.

Sincerely,

A handwritten signature in cursive script that reads "Lori Suddick".

President
