RE: Sustainability Tracking, Assessment and Rating System  
College of Lake County Submission

Dear STARS Team:

The College of Lake County (CLC) has a deep commitment to promoting sustainability throughout our institution. Sustainability has been identified as one of CLC's strategic priorities. CLC identifies and tracks its own goals and objectives in its Sustainability Plan. As a pilot participant in the STARS program and signatory of Second Nature's Climate Commitment, CLC serves as a model for sustainable practices.

The college is currently building out its Sustainable Master Plan with renovated and new buildings that incorporate energy efficiency and renewable energy systems on all three of our campuses. For two years, cross-disciplinary faculty task forces have concentrated on building a faculty development system for integrating sustainability into courses. Beyond the college, CLC continues to serve as leader and facilitator of sustainability initiatives in the Lake County community.

CLC is proud to produce this updated STARS submission and looks forward to future submissions that reflect the great strides still being taken to enhance sustainability initiatives across the college's campuses, curricula, and community.

Sincerely,

A handwritten signature in black ink that reads "Jerry Weber". The signature is written in a cursive, flowing style.

Jerry Weber, Ph.D.
