Analysis of NUI Galway's SDG Research Output 2016-2020

Purpose: The purpose of this paper is to analyse the distribution of research output that NUI Galway is contributing to across 16 of the 17 sustainable development goals. Using SciVal data to assess the quality and impact of NUI Galway's research towards the UN SDGs and also to help highlight our research strengths and opportunities for growth across the university. It can also serve as a tool to help find current and potential collaboration in multi-disciplinary research areas.

SciVal (the interface to the Scopus database) introduced a mapping of all publications on its database to the SDGs in 2020, using a keyphrase search analysis mapping key phrases to each of 16 of the 17 UN SDGs (no SDG 17). It updated their methodology in 2021 introducing a different methodology “Machine Learning” to supplement their search query terms. *Therefore the data in this report is not directly comparable with our 2020 report given the different mapping methodology.*

All of these United Nations (UN) SDGs can be viewed as Research areas within SciVal and can be broken down by country and by institution. Each of the SDGs can be individually analysed further in terms of keywords, key topics, key authors and key collaborations.

We would highlight that this report is not the complete reflection of NUI Galway's contribution to the UN SDGs, as much of our research, particularly in the Arts & Humanities and Social Sciences is not captured in the Scopus database. Hence this is a snapshot of only a section of it.

Note Scopus is Elsevier's abstract and citation database which covers nearly 36,377 titles (22,794 active titles and 13,583 inactive titles) from approximately 11,678 publishers, of which 34,346 are peer-reviewed journals in top-level subject fields: life sciences, social sciences, physical sciences and health sciences)

1 Introduction:

The data below summarises NUI Galway's performance across the 16 SDGs and compares it at an Irish level and also at a global level, to identify which SDGs NUI Galway is performing well in and which present an opportunity for further development.

In the analysis below the number of Publications are examined to indicate which UN SDGs NUI Galway is contributing to, and how it compares on a national and global level.

The Field Weighted Citation Ratio (FWCI) and the % of papers in the top 10% most cited per SDG is also investigated (to highlight which SDGs NUI Galway's research is being heavily cited in) as a measure of the impact of our research.

2 NUI Galway publications per SDG 2016-2020

Graph 1 shows the distribution of NUI Galway's SDG related publications on Scopus across all SDGs 1-16. It demonstrates that under the revised methodology, almost 40% of NUI Galway's SDG related publications are in SDG 3 – similar to the global percentage (38%).

7 Summary

Reviewing the data above, we can surmise the following:

Those SDGs where we have high output:

SDG 3 – NUI Galway’s highest no of publications. Grew by almost 14% over the period, above global average FWCI but below Ireland FWCI.

SDG 7 – NUI Galway’s second highest no. of publications, growing 9% over the period. However lower presence and FWCI /highly cited papers than other Irish Universities.

SDG 16 – NUI Galway’s third highest no. of publications, but static over the period. 3rd highest no of publications in Ireland, above average global representation and second highest FWCI.

SDG 9 – 4th highest no of publications, showing 8% growth over the period. 4th in Ireland in terms of no. of publications and 3rd in terms of impact.

SDG 14 – While this is only NUI Galway’s 5th highest no. of publications, it is growing rapidly at 15% and is the highest no of publications in Ireland and above global average representation. However, NUI Galway are second in Ireland for both FWCI and highly cited papers.

Those SDGs where we have high impact and thus the opportunity to grow:

SDG 5 – 99 papers over 5 years , no 3 in Ireland in terms of no. of pubs, and has grown significantly at 30% over the period. It is NUI Galway’s highest impact in terms of FWCI at 5.59, behind only UCC’s FWCI, although that is likely off a few papers as we only have 9% of papers in the top 10% highly cited percentiles, 6th in Ireland.

SDG 11 –202 papers over the period, no 3 in Ireland, and above global average representation. Displays lower growth at only 1.6%. However achieving high impact in this SDG – it is NUI Galway’s second highest FWCI at 2.54 and over 25% in most highly cited percentiles.
