

Western Caspian University

## Ethical consumption & production action plan

### Instructions

Western Caspian University invites not only its students, university staff members, but also community to increase responsibility over consumption & production patterns. The purpose of these instructions is to improve efficiency of consumption & production.

- Increase sustainable consumption & production and waste management education
- Minimize waste produced within and beyond the University
- Decrease the use of non-renewable natural resources & toxic materials
- Preserve and manage existing resources in order to make production & consumption balance over the long term
- Purchase products in reusable or returnable packaging
- Have always vegetarian meal options
- Use low-temperature heating system
- Increase the use of electronic devices for representation in order to save papers, markers, and etc.
- Switch to consumption of eco-friendly bricks
- Consume energy efficient led lamps and double-paned windows
