

Western Caspian University
Environmentally-Friendly Action Plan

Environmental instructions

Western Caspian University (WCU) invites not only its students, university staff members, but also community to make contribution in sustainable environment. The purpose of this instruction is to increase awareness about environmental issues and initiative to eliminate the harmful consequences of them. The university supports the principles of reduce, reuse, and recycle.

We can make a substantial influence on environment by implementing of this plan such as:

- To get involved in environmental responsibility and waste management in both theory and practice manner in all faculties and departments of the university
- To reduce water consumption by shutting off water tap if not necessary
- To minimize carbon footprint by using public transport vehicles instead of private cars
- To use more glass bottles rather than single-used plastic bottles
- To use both sides of papers efficiently and drop used papers into recycle bins for only papers
- To drop plastic bottles and bags into recycle bins for only plastics
- To prefer led lamps to achieve energy efficiency
- To turn off lights and computers if not necessary
- To grow flowers and other plants

Western Caspian University gives instructions about the environment in its buildings and website for students, university staff, and visitors. The university uses alternative energy sources such as sanitizing rainwater for usage in the farm and plants of the university, as well as building panels to receive solar power.
