**RE: Missouri S&T Solar Village**

To Whom It May Concern:

Please accept this letter as an affirmation that Missouri S&T's Solar Village is an innovative demonstration of the University's sustainability leadership.

The Solar Village consists of four solar-powered homes designed and built by Missouri S&T students participating in the Solar House Team. The Missouri S&T Solar House Team is a student design team that seeks to advance the University, community and environment through focused research, public education and sustainable design. These solar homes serve not only as campus housing, but are also used to educate the public, provide research opportunities, and demonstrate current and future GHG reduction steps available to the community.

Sincerely,

A handwritten signature in black ink, appearing to read "Tony Arnold", written over a horizontal line.

Tony Arnold  
Assistant Director  
Office of Sustainable Energy & Environmental Engagement
