Brief Description of the Inventory

Based on the definition above, 31 repositories exist on campus. Of the 82 campus centers & research institutes, 21 have a repository. Of the 92 departments, eight have repositories and of the 13 colleges, only one has a repository at that level. The repositories seem most closely aligned with research centers & institutes rather than a college or department as a whole. Almost all provide text-based documents in pdf format, some offer multimedia, more than half use web servers + html (as opposed to a recognizable software such as DSpace, etc.).
