Environmental Responsibility

Safeguarding the environment for the benefit of all peoples now and in the future is a matter of increasing concern in the academic community as well as in society generally. Vendors shall make every effort to demonstrate environmentally responsible practices and production methods, and meet well-established certification standards. This would include minimization of waste products, use of postconsumer recycled materials, energy efficiency, and the durability, biodegradability, and reparability of the products received from the vendor by the university.

All equipment, chemicals and supplies will be the most sustainable available.

All supplies and chemicals used by the Contractor on commencement of service must be pre-approved by the University. The Contractor shall not change any supply or chemical without seeking approval of the University. **All chemicals that you intend to use shall accompany this proposal, as well as a listing at the end of each month. This monthly list will go to Tom Sassatelli in purchasing. All chemicals will be certified green by an independent source.**

January 8, 2011

The above specification requires the contractor to provide a chemical listing to Tom Sassatelli, Buyer for Purchasing and Business Services. Per the requirements of PUR 210 Green Purchasing, Tom Sassatelli will only approve cleaning products that comply with Green Seal certification standards.
