

ENVIRONMENTAL CENTER

UNIVERSITY *of*
NORTH FLORIDA

To Whom It May Concern:

This letter is an affirmation of the UNF Campus Natural Assets Inventory (CNAI). This inventory is a comprehensive list of all species present on the campus lands. The UNF campus is fortunate to possess set-aside preserve lands, called the Sawmill Slough Preserve, consisting of 382 acres of land held in preservation in perpetuity. This is a rare asset. The CNAI is ongoing on the Preserve lands, and a complete terrestrial plant list has been developed. Students are currently cataloging aquatic plants and lichens. This program is uncommon; most campuses do not have this large a preserve or systematic program for cataloging its biodiversity.

Sincerely,

Radha Pyati, Ph.D.
Director
Environmental Center
