Lexington, KY 40507

**RE: Wilfrid Laurier University STARS Report Submission**

Wilfrid Laurier University (Laurier) is committed to justice and sustainability now and in the future. As a growing university, we recognize that our activities have an impact upon the environment and acknowledge that we have a responsibility for the protection of the environment and our members and the community. Through the recent development of a Sustainability Office, Laurier is working towards the integration of sustainability practices in all areas of the University and to inspire, educate, and prepare others to engage in these same practices.

The completion of the STARS submission recognizes the hard work of the University to become a leader in campus sustainability. We are pleased to have excelled in areas such as sustainability research, dining services, water consumption and in creating a diverse community and a culture of inclusivity. We look forward to using STARS to measure our future progress as we continue to improve the sustainability of our campus.

Wilfrid Laurier University obtained a bronze rating upon completion of the STARS assessment. The following submission has been completed with accurate information and to the best of my knowledge.

Sincerely,

A handwritten signature in black ink, appearing to read "Max Blouw", written over a large, sweeping flourish.

Max Blouw, PhD  
President and Vice-Chancellor
