

9 June 2011

REF: Sustainability Course and Research Inventory

The University of Nevada, Las Vegas presents an inventory of sustainability courses for your review. This inventory identifies and includes courses at both the undergraduate and graduate levels. In conjunction with an augmented inventory of research, this specialized catalog provides a snapshot of activities focused on and related to sustainability across the campus.

With an emphasis on economic, environmental, and social sustainability as core values, UNLV hopes to demonstrate how the efforts of numerous stakeholders across the spectrum of disciplines are adding value to the academic experience. The curricular dimension of the inventory systematically lists all courses (both focused and related), courses by department, and learning outcomes by program. The research side addresses faculty involved in sustainability research, in addition to research broken down by department.

The course inventory has been compiled using a blend of several methods. It all begins with a comprehensive query of the UNLV Undergraduate Catalog 2010-2012 and the Graduate Catalog 2009-2011. Each catalog covers three years of courses. These results are then augmented by faculty outreach in the way of a comprehensive survey. A survey has also been used to supplement and update an existing UNLV Renewable Energy Research Inventory produced in 2010. The research inventory represents a partial list of faculty that have either self-identified themselves as engaged in sustainability related research or are being supported by the Urban Sustainability Initiative. This is not a complete list and there are likely other faculty on campus that could be added.

Sincerely,

A handwritten signature in black ink, appearing to read "T. Piechota", is written over a light gray circular watermark.

Thomas Piechota, PhD, PE
Associate Vice President for Interdisciplinary Research

University of Nevada, Las Vegas

All courses found in the Undergraduate Catalog 2010 - 2012 or Graduate Catalog 2009 - 2011
