

February 2016

In the Fall of 2015 the College installed three (3) bike Fix-it stations.

The stations will allow for easy bike repair to the bikes that many students have on campus, especially during their first year when they are not permitted to have cars. The hope is that these stations will encourage bike use in the student population, as well as cut down consumerism associated with non-communal air-pumps and bike fixing tools.

Increasing bike use on campus will be healthy, both physically and mentally for students, as well as reduce carbon emissions every time bicycles are chosen over a motor vehicle as a mode of transportation. In addition to these things the bikes are composed of 83.6% post-consumer recycled content.

Sincerely,

A handwritten signature in black ink, appearing to read "Eric Richardson", written in a cursive style.
