Paul Rowland, Executive Director
Association for the Advancement of Sustainability in Higher Education
213 ½ North Limestone
Lexington, KY 40507

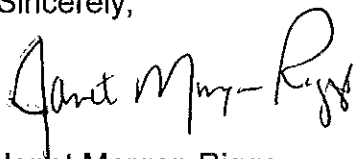

Dear STARS Steering Committee,

Gettysburg College is proud to submit its second Sustainability Tracking, Assessment, and Rating System (STARS) report to the Association for the Advancement of Sustainability in Higher Education (AASHE). As President of Gettysburg College, I affirm that this report is an accurate and comprehensive evaluation of sustainability initiatives undertaken by our institution.

Based on the information we collected for the assessment, Gettysburg College has attained a STARS "Silver" rating. We believe that this rating is an accurate portrayal of the College's level of commitment to sustainability across our campus, curriculum, and administration. The assessment continues to provide us the opportunity to identify areas for advancing our sustainability efforts.

We continue to appreciate the work of AASHE as we all work towards a more sustainable future.

Sincerely,

Janet Morgan Riggs
President
