Hi Jorge,

I believe everything is as accurate as possible at this time.

Thanks for your support!

Best,

Thank you very much Sean.

I appreciate your work on this.

If you are comfortable that our numbers are correct.. let's roll.

Thanks.

Good afternoon everyone,

Attached are the updated reports for our greenhouse gas inventory. Since our first meeting I have double and triple checked the data and subsequently made corrections where applicable. *(some internal communication redacted for STARS publication purposes)*

I will attach the GHG report to our STARS submission before I leave today, and I'm sure Shanna will be in touch when we're ready to hit submit on that!

Here are some comparisons to other universities in the NC System, just FYI:

University	GSF	GHG MTeCO ₂	Year
ECU	6,868,261	128,793.44	(2017)
UNC Charlotte	9,383,653	120,474	(2010)
App State	5,174,003	78,556	(2013)
UNC Greensboro	6,053,737	83,645	(2018)

Thank you all for your cooperation and patience. Please let me know if you have any further questions.

Best,
