

Sustainability at UCLA

Can you imagine a world without waste? You don't have to imagine it—UCLA has programs in sustainability across waste, energy, water, transportation and more. There are lots of ways to get involved from student clubs to undergraduate research opportunities.

But we need your help!

UCLA is moving us one step closer to Zero Waste by keeping trash out of landfills. Every person needs to do their part to help make our campus green.

UCLA Sustainability

UCLA has a three stream system for compost, recycling, and landfill. You'll see bins like this around campus!

This can get confusing, so here's a quick guide to help SORT this out!

Want to keep up with UCLA's Sustainability goals and progress?
