To: Stars AASHE Reporting confirmation

As the individual responsible for paying the Dining Lair Marketplace waste hauling. I am confirming the waste hauling reduction of 74 Tons per year is attributed to implementing an Emulsification/Dehydration/Vermiculture/Bio-Feed program at the Lair Marketplace Dining Facility. I attest to the purchase and investment of the Equipment which made this a reality.

University Savings is currently at \$10,000 per annum associated with this location.
