

STARS 2.1 Food and Beverage Purchasing Inventory

This tool was produced to provide a consistent format for STARS participants to document their expenditures on more sustainable food and beverage products.

Instructions

- 1) Conduct an inventory to identify products that qualify as Third Party Verified and/or Local & Community-Based and enter each product in the Inventory tab, below.
- 2) Record food and beverage expenditures for the reporting period in the Expenditures tab.
- 3) Report results (Results tab) and upload this spreadsheet as documentation in the online STARS Reporting Tool.

Institution	University of Alberta (January 1 - December 31, 2019)
-------------	---

Products that qualify as Third Party Verified and/or Local & Community-Based

A. Do you have reason to believe a product is sustainably produced or locally grown? Potential reasons include:
 + The product carries a third party certification or ecolabel.
 + The vendor is regionally based.
 + The product is advertised as "local" or sustainable.

B. If the product carries a certification or ecolabel, check the list in the Criteria tab to see if it qualifies as Third Party Verified. If it does, include it below.

C. If the product doesn't qualify as Third Party Verified, but it comes from a regional distributor or a local farm or business, use the table in the Criteria tab to determine if it qualifies as Local & Community-Based.

Product vendor	Product code (optional)	Product label/brand	Product description	Third Party Verified? [1]	Standard(s) met (e.g. Certified Organic, Fairtrade certified)	Local & Community-Based? [2]	Information justifying inclusion of the product (i.e. ownership, size, distance, production methods)
