

University of Ottawa – 2020 Inventory of Institutional Sustainability Research

In 2021, the Office of Campus Sustainability conducted a review of the researchers on campus that are conducting sustainability related research. This was undertaken using a simple methodology;

1. A list of sustainability related terminology was created in line with the three primary pillars of sustainability (social, economic, and environmental).
2. The biographies, published works, and research interests of every researcher at uOttawa were scanned for sustainability terminology.
3. If a researcher's work included at least two of the three streams, they were added to the inventory.

In all, 229 researchers were identified at the University, representing 45 departments.

Researcher	Department	Faculty	Email	Themes
<u>Abel Brodeur</u>	Economics	Social Sciences	abrodeur@uottawa.ca	Social and Economic
