2018 RENEWABLE ENERGY CERTIFICATE PROSPECTIVE PRODUCT CONTENT LABEL¹

This is a Renewable Energy Certificate (REC) product and does not contain electricity. A REC represents the environmental benefits of 1 megawatt hour (MWh) of renewable energy that can be paired with electricity. For more information visit: www.green-e.org/rec

The Multiple Mix Product is sold in blocks of 1,000 kilowatt-hours (kWh). For each year under contract as defined within the Agreement the Multi Mix Product will be made up of the following renewable resources.

Green-e Energy Certified New Renewables ² in Multiple Mix REC		Generation Location
Wind, Solar, Biomass, Landfill Gas, Geothermal, or Hydroelectric ³	100%	Any of the 50 United States of America or, Canada

1. These figures reflect the renewables that we have contracted to provide. Actual figures may vary according to resource availability. 3Degrees will annually report to you before August 1 of next year in the form of a Historic Product Content Label the actual resource mix of the RECs you purchased. Your Agreement may stipulate that 3Degrees will deliver a more specific Product mix than what is described in the Product Content Label and each of these individual sales will be audited annually within our Multiple Mix Product. 3Degrees will provide an Attestation upon each delivery disclosing the specific regions, technologies and facilities that supplied the RECs for your purchase. The Product defined in your Agreement will be delivered within the timeframes set within the Agreement.
2. New Renewables come from generation facilities that first began commercial operation within the past 15 years. This Product may include generation from facilities that were approved for extended use under a strict set of criteria by Green-e Energy and/or qualify as repowered.
3. Eligible hydroelectric facilities are defined in the Green-e Energy National Standard (www.green-e.org/getcert_restan.shtml) and include facilities certified by the Low Impact Hydropower Institute (LIHI) (www.lowimpacthydro.org) or EcoLogo (www.ecologo.org); and facilities comprised of a turbine in a pipeline or a turbine in an irrigation canal.

For comparison, the current average mix of resources supplying the U.S. includes: Coal (30.1%), Nuclear (20%), Oil (.5%), Natural Gas (31.7%), Hydroelectric (7.5%), Wind (6.3%), Biomass (1.6%), Solar (1.3%) and Other (.7%). This resource mix was prepared in accordance with the U.S. Energy Information Administration as of March 7, 2018.

If the purchase was for a non-specific blend of resources, the particular supply delivered will be determined through the optimization of the 3Degrees REC portfolio. For specific information about this REC Product, please contact 3Degrees Group, Inc., (866) 476-9378, www.3degreesinc.com.

 The Multiple Mix Product is Green-e Energy certified, and meets the environmental and consumer-protection standards set forth by the nonprofit Center for Resource Solutions. Learn more at www.green-e.org.

Hi John,

Thanks for reaching out. The product we sold you is for Reporting Year 2019 and the Agreement states the delivery date as "On or before April 15th of the year following each Reporting Year" so we expect to deliver and invoice together sometime before April 15, 2020. We will do our best to send you supply in 2019 if that is your preference so send us an email next year and we can see what we can do.

Let me know if that answers your question or if you need anything else.

Thanks!

+

Haminy, Stephanie:

Please let me know when WCU can expect to receive an invoice and, more importantly, an attestation letter from 3 Degrees for its purchase of renewable energy credits as per the attached PO.

Your earliest response would be appreciated John Lattanze

Haminy:

With WCU's issuance of the attached PO to purchase RY2019 REC's, could you kindly let me know when we can anticipate receiving an invoice and attestation letter from 3 Degrees?

Thank you John L.
