Lexington, KY 40507

Dear STARS® Steering Committee:

On behalf of Colorado College, I am pleased to present the results of the 2021-22 Sustainability Tracking, Assessment, and Rating System.

Sustainability is central to our community and to providing opportunities for all. We aspire to make Colorado College a model for sustainability. We aim to be an academic community that lives its commitment to a thriving future, honoring the economic, social, and environmental narratives of our complex ecosystem.

Colorado College's continued participation and rating in STARS® guides our efforts across campus to address sustainability issues together with other college initiatives. The results from this assessment are the outcome of the work of many people across campus and serve as both a record of our improvements and as an updated baseline. Data collection for this rating fosters collaboration between departments across the college and will drive progress into the future.

On behalf of Colorado College, thank you for increasing sustainability awareness and improvement at colleges and universities in a measurable way. We look forward to continuing our relationship into the future.

Warm regards,

L. Song Richardson
