

AASHE STARS Letter of Affirmation

December 10, 2021

AASHE STARS Manager,

The Colorado School of Mines began collecting data for AASHE STARS in 2019. We took advantage of the pandemic to expand data collection efforts through faculty and students doing sustainability-related coursework. We completed data collection in 2020, but had to delay completion of the review template due to the pandemic. We completed data review in 2021.

I performed a first and second review of all the data and many staff and faculty from academic and operations reviewed the data as well. We also had an outside engineering consulting firm review the energy use and renewable energy data. Reviewers are listed in the reporting assurance section. To the best of my knowledge and the knowledge of reviewers, the information submitted is correct.

Please contact me with questions.

Best regards,

A handwritten signature in blue ink that reads "Lauren Poole".
