Re. STARS innovation credit

To whom it may concern,

I am writing to affirm that the Balance-Unbalance conference held at Concordia University November 4th and 5th, 2011 represented a unique and innovative example of our commitment to sustainability leadership.

The conference entailed two days of reflection, debate, and the promotion of projects and actions regarding the environment and our human responsibility at this defining moment in our history. It brought artists together with scientists, economists, philosophers, politicians, sociologists, engineers, and management and policy experts—among others—with the intent of engendering a deeper awareness and creating lasting intellectual working partnerships addressing environmental and sustainability issues.

Sincerely,

Peter Morden, PhD
Associate Dean, Academic Facilities
Faculty of Arts and Science
