RE: IN-1: Innovation 1 100% Sustainable Cleaning

Dear Mr. Rowland,

On behalf of the Custodial Services at Boston University, I would like to affirm that, to the best of my knowledge and ability, the information presented for credit IN-1 is complete and accurate.

The enhanced version of the Sustainable Cleaning Program began with a pilot in the Center for Student Services in 2012 and is now serving as a model as the University rolls the program out across the rest of the campus. The program aims to improve health, reduce water, material, and energy consumption, and minimize the amount of solid waste entering the waste stream. 100% of the cleaning products used by Custodial Services in Center for Student Services are certified by Green Seal and EcoLogo, two of the highest standards in sustainable consumer goods.

Boston University is proud of its ability to meet high standards of cleanliness through the use of cleaning products, materials, and equipment, which create a healthier indoor environment for our community and with minimal harm to the environment. As the program continues its integration into the University's daily routines, it will further benefit our campus and the community as a whole.

Sincerely,
Boston University
