RE: IN-4: Innovation 4

Dear Mr. Rowland,

On behalf of TranSComm at Boston Medical Center and Boston University Medical Campus, I am pleased to submit this letter of affirmation that the information presented for credit IN-4: is complete and accurate to the best of my knowledge and ability. This is a forward-thinking project, an investment for the future.

We feel the installation of these Electric Vehicle (EV) Charging Stations is an important step in our shared goals of decreased air pollution, increased clean energy awareness, alternative transportation solutions and a commitment to the future.

The EV charging stations were launched in February 2012 and we look forward to increased participation as we provide sustainable transportation options for the hundreds of commuters that receive care from, are employed by, or study at our sponsoring institutions.

Sincerely,

A handwritten signature in blue ink that reads "Maureen Lacey Flaherty". The signature is written in a cursive, flowing style.

Maureen Lacey

Director, TranSComm
