

Christophe Mouysset
Director of Corporate Relations
Euromed Management

23 April 2013

The Euro-Mediterranean Management Foundation (La Fondation Euro-Méditerranéenne du Management) was launched in 2010 under the aegis of the Foundation of France with the mission to promote the development of Euromed Management by facilitating access to higher education and contributing to the training of efficient and responsible managers. It supports:

- Students through the financing of scholarships and grants based on merit and social criteria;
- Management research by financing chairs, conferences and networks in fields of interest to corporate donors; and
- The development of new clusters and specializations, innovative educational tools and real estate developments.

This initiative deserves a credit for innovation as the Foundation is truly a sustainability promoting tool. Through the foundation, more than 200 students received financial assistance and sustainability research projects were funded. An emergency fund was also created and used for students in financial distress.
