

March 2nd, 2023

Mr. Andrew Porter  
Director of Space Management  
Division of Administration and Finance  
Planning + Design + Construction  
University of Cincinnati  
51 Goodman Drive  
Cincinnati, OH 45221-0186

Dear Mr. Porter:

It is with pleasure that I write to affirm the review of the University of Cincinnati's 2023 STARS 2.2 submission. Based on the provision of supporting data and documentation by staff at the University of Cincinnati (UC) to the Unlimited Carbon Assistance Network (UCAN) during winter 2022-2023, we believe that UC will achieve a well-earned "Gold" ranking under version 2.2 of AASHE's Sustainability Tracking and Rating System (STARS).

We have reviewed UC's report, and the supporting information provided, and are satisfied that the reporting criteria for each credit has been met as completely and accurately as possible, and all identified inconsistencies and errors have been successfully addressed. This is represented in the data included in the accompanying "Review Template," provided by AASHE and completed collaboratively by staff from UC and U-CAN.

We are happy, of course, to answer any further questions or to be a resource as you progress through the final AASHE STARS submission and review process; please don't hesitate to reach out with any additional questions. In the meantime, we wish you sincere congratulations on your sustainability accomplishments to date, as reflected in this submission. UC has much to be proud of in regard to its history of sustainability leadership, and we wish you the best in your continued efforts!

Sincerely,

A handwritten signature in blue ink, appearing to read "Jennifer R. Andrews".

Jennifer R Andrews, Partner
