University's Association for the Advancement
Of Sustainability in Higher Education
Sustainability Tracking, Assessment & Rating

Dear Committee:

Enclosed you will find Fayetteville State University's (FSU) Sustainability Tracking, Assessment & Ratings System (STARS) submission. After a thorough review, I find this report to be accurate and represent FSU's overall efforts toward being a sustainable campus.

During 2012, FSU has made many sustainability accomplishments. While all are too numerous to mention here, please allow me to share a few of them with you.

- Completed Climate Action Plan
- Published 2011 Sustainability Report
- Expanded sustainability website
- Incorporated sustainability into ecology course
- Adopted LEED Certification Policy
- Completed Storm Water Master Plan
- Established Director of Sustainability Position

As you can see, Fayetteville State University, realizes the importance of making our campus one that is friendly to the environment and void of any elements that would deplete its natural resources. We also know that saving our planet and supporting a long-term ecological balance is not only important, but also necessary.

Sincerely,

James A. Anderson
Chancellor
