

Marine Science Lecture – Post Bonaire Trip Reflection

YOUR NAME:

Please write a few sentences for each prompt.

1. During your time on Bonaire, what did you observe regarding the island's various sustainability initiatives? What seemed like useful sustainability ideas that we could implement in Salisbury/Catawba College?
2. What sustainability suggestions would you offer to the municipality of Bonaire in the future as it grows in population and cruise traffic?
3. Reflect on an ecological interaction (mutualisms, symbioses, predation) you observed among the reef organisms.
4. If you returned to Bonaire in the near future, what opportunities would you take advantage of that you didn't have time to do on this trip (e.g. specific dives, certain organisms to look for, non-diving activities).
5. What did you learn about Bonaire that you would like to share with a future student in this class?
6. Give a quote about your experience:
