To Whom it May Concern,

As the Associate Vice-President of Facilities Planning and Operations at Miami University and a Professional Engineer in the State of Ohio, I am proud to offer a unique and innovative installation combining storm water treatment, storm water management, geothermal heating and cooling, energy reduction, and water conservation. To my knowledge, no other such concept has been developed and/or implemented other than on our campus.

The positive outcomes of this design and installation are substantial. Finding creative and innovative solutions to problems is woven deep into our culture at Miami University. I'm happy to affirm that this is a unique and innovative solution only found on our campus.

Thank you,

Cody Powell
Associate Vice President –
Facilities Planning and Operations
