

Welcome to Conn; we're excited you're here!

Sustainability is one of our core values and we hope you'll incorporate it into the work that you do.

At Conn, sustainability is a framework to find solutions to problems by ensuring that environmental stewardship, social equity, and economic wellbeing are all included in decision making processes.

Sustainability means...

...growing food for our community right here on campus.

...using geothermal energy to heat and cool New London Hall.

...conserving land in our Arboretum.

...promoting equity and collaboration between staff, faculty and students through shared governance.

Sustainability means adopting practices that conserve our resources - and we need your help!

- shop Office Swap in CTW OneSource first when you need supplies. It's free!
- shut off the lights when you leave a room
- shut off your computer at the end of the day
- avoid printing what you don't need to save
- walk around campus instead of driving
- use a reusable water bottle and one of our filling stations to stay hydrated
- try to limit your waste and make sure to recycle right
