

**What is UConn's Climate Action Plan?**

1 point

- A. A document stating our university's commitment to promoting sustainability
- B. A petition written by UConn's student population urging promotion of sustainability on campus
- C. A framework for guiding our university towards carbon neutrality and a higher standard of sustainability on campus
- D. a and c

**Which of the following is true about the Spring Valley Student Farm? Check all that apply.**

1 point

- It is connected with UConn Living Community EcoHouse
- It produces food for some of UConn's dining halls
- It is located near Whitney Dining Hall
- Cattle is raised at the Spring Valley Student Farm

**What is the primary source of UConn's energy?**

1 point

- A. Eversource power company
- B. The CoGeneration Facility
- C. Wind power
- D. Norwich Public Utilities

**Which of the following are ecosystem services provided by a wetland?**

1 point

- A. Water purification
- B. Flood protection
- C. Food cropping
- D. Wildlife Habitat
- E. a and d
- F. a, b and d

**Which of the following buildings at UConn have been LEED (Leadership in Energy and Environmental Design) certified?**

1 point

- A. Oak Hall
- B. Beach Hall
- C. Biology/Physics Building
- D. a and b

**How frequently should you recycle items while at UConn?**

1 point

- A. Daily
- B. Once per week
- C. Once per month
- D. Never

**Which of the following items should be recycled? Select all that apply.**

1 point

- Paper
- Plastic bottles
- Cans
- Electronics
- Newspapers
- Clothing

**Does UConn have mixed recycling?**

1 point

- A. Yes
- B. No

**What is Football Green Game Day?**

1 point

- A. A day where students wear green to a football game to support sustainability
- B. A day where student volunteers go to a football game to collect recyclables from tailgaters and promote environmental awareness
- C. A day where environmental student groups go to a football game together in order to support sustainability
- D. A game day where all football players wear green to demonstrate the university's commitment to sustainability

**Climate change may result in:**

1 point

- A. Severe droughts
- B. Severe flooding
- C. Shifting in areas where crops can grow
- D. All of the above

**Which three countries have the highest populations in the world?**

1 point

- A. US, China and Brazil
- B. China, India and the US
- C. China, Mexico and the US
- D. Russia, China and the US

**What does Connecticut's DEEP stand for?**

1 point

- A. Department of Energy and Economic Promotion
- B. Department of Environment and Energetic Processes
- C. Department of Energy and Environmental Protection
- D. Department of Environment and Ecological Protection

**Which of the following elements are part of sustainability?**

1 point

- A. Environment
- B. Social
- C. Economic
- D. a and b
- E. All of the above

**What percentage of food is wasted in the US?**

1 point

- A. 5%
- B. 10%
- C. 20%
- D. 40%

**Why is the loss of major rainforest lands, such as those in the Amazon Forest, such a pressing problem?**

1 point

- A. The trees provide food, medicine and shelter, which will be lost if they are not harvested sustainably
- B. The forests provide habitat for many important species
- C. Trees counter climate change by absorbing oxygen from the atmosphere
- D. a and b
- E. All of the above

**Which of the following strategies can you employ to reduce your environmental impact? Select all that apply.**

1 point

- Taking shorter showers
- Turning the water off when brushing your teeth
- Only washing full loads of laundry
- Reporting leaking sinks to ResLife/landlord

**Which of the following is the largest contributor to pollution in the ocean?**

1 point

- A. Oil leaking from boats
- B. Runoff from land sources
- C. Dumping garbage into the ocean
- D. Noise pollution from shipping traffic

**Why is buying local more sustainable than buying items imported from far away?**

1 point

- A. Less energy is used to transport the items
- B. Well managed farms can conserve soil quality, protect water from pollution, and provide habitat for wildlife, like bees.
- C. Supporting small businesses helps local economies flourish
- D. All of the above

**What is the most major concern associated with the global decline of bee populations?**

1 point

- A. Bees are consumed as food in many developing countries
- B. Biomagnification of chemicals as contaminated bees are consumed by birds, snakes and mammals
- C. Loss of pollinators, which are vital for the functioning of global agriculture
- D. Plants controlled by bees will become overpopulated

**Which fuel, when combusted, caused the largest emission (per unit fuel) of greenhouse gases?**

1 point

- A. Oil
- B. Coal
- C. Natural gas
- D. Biofuels
