

2019-2020 Sustainability Course Listing

Survey Response	Sustainability Learning Outcome
1	Do any of your classes provide students with the resources to Explain how biophysical and social systems are interdependent and interact to prevent or foster sustainability?
2	Do any of your classes provide students with the resources to Describe how sustainability relates to environmental issues, social justice and economic development?
3	Do any of your classes provide students with the resources to reflect and provide examples how sustainability relates to one's area of study / discipline?
4	Do any of your classes provide students with the resources to articulate and demonstrate a personal philosophy or commitment to address sustainability in one's personal life, community involvement and civic engagement?
5	Do any of your classes provide students with the resources to demonstrate ability to apply sustainability through engaged learning on campus or in their community?
6	Do any of your classes provide students with the resources to articulate and demonstrate a commitment to promote a more just and humane society within a sustainable global environment?
7	Do any of your classes provide students with the resources to Develop and demonstrate skills as a strategic change agent in the context of sustainability? (See skills list below. A course must demonstrate that it is explicitly related to sustainability as defined to be included in the inventory).

LISTING OF ALL SUSTAINABILITY COURSES BY LEARNING OBJECTIVE

ACADEMI	ACADEMI	CATALO	COURSE TITLE	COURSE DESCRIPTION	SUSTAINABILITY LEARNING OBJECTIVES	UNDERGRADUATE / GRADUATE COURSE	SUSTAINABILITY RELATED OR FOCUSED
ACISC	ARR	101	Sci Basis Environment Issues	The foundational course in science is predicated on the view that understanding environmental issues and their underlying scientific principles will occupy a central role in our students' lives and will be critical in their development as informed and participating members of society. The overarching strategy of the course will be to frame environmental science in terms of a series of interacting systems to allow students to analyze a variety of environmental issues	1-7	UG	Sustainability Focused
ACPSY	ARR	275	Social Psychology	This course is an introduction to the field of social psychology, which seeks to understand human behavior by viewing it within its social and cultural context	3, 4, 7	UG	Sustainability Focused
AFR	CAS	102	Intro to Black World Studies	Introduction to Black World Studies examines several cultures within the Black world, across various countries and regions around the globe. Students will be familiarized with the impact of tradition, religion, oppression, popular culture, art, memory and specific aspects of trans-generational practices on these cultures as well as the influences of colonialism upon African peoples and the latter upon the former.	1-4, 6, 7	UG	Sustainability Focused
ANTH	CAS	100	Globalization&Local Cultures	This course is a study of cultural diversity on a global scale, and provides a comparative perspective on the investigation of humans as cultural and social beings.	1, 2, 4, 6, 7	UG	Sustainability Focused
ANTH	CAS	103	Bio Bkgrnd Hum Soc Behvr	This course examines possible biological bases of modern human behavior, from a scientific and multi-disciplinary perspective, to explore questions regarding what comprises "human nature"	1, 2, 3	UG	Sustainability Focused
ANTH	CAS	104	The Human Eco Footprint	This course is an introduction to global human ecology and concentrates on how we as humans affect global ecosystems and how these changes can impact our behavior, health, economics, and politics.	1-7	UG	Sustainability Focused
ANTH	CAS	105	Human Biocultural Diversity	This course examines the history of the concept of the biological race, the emergence of scientific racism, and modern human interpopulational biological diversity from an evolutionary perspective	1, 2, 3	UG	Sustainability Focused
ANTH	CAS	231	Linguistic Anthropology	This course introduces students to the field of linguistic anthropology through a survey of topics, including the biology and evolution of language, the relationship between language and thought, and the use of language as an index of social and cultural change.	1, 2, 7	UG	Sustainability Focused
ANTH	CAS	325	Primatology-Behavr&Ecology	This course focuses on the interrelationship of the behavior and ecology of our closest living relatives, the primates (apes, monkeys, and prosimians).	2, 3, 4, 6, 7	UG	Sustainability Focused
APHS	HSPH	424	PubHlthNtrRschThryDietPracti	<i>description not available in LOCUS</i>	1, 3, 6, 7	G	Sustainability Focused
BIOL	CAS	101	General Biology I	Fundamental principles of Biology including: introduction to the scientific method, basic biological chemistry; cell structure and function; energy transformations; mechanisms of cell communication; cellular reproduction; and principles of genetics	1-3	UG	Sustainability Focused
BIOL	CAS	111	General Biology I Lab	Complements General Biology I lecture material through observation, experimentation, and when appropriate, dissection of representative organisms. Physical and chemical phenomena of life as well as systematics and comparative anatomy and physiology of selected organisms will be examined.	1-3	UG	Sustainability Focused
BIOL	CAS	265	Ecology	Relationships of organisms to their environment and to each other at the organism, population, community, and ecosystem levels.	1-7	UG	Sustainability Focused
BIOL	CAS	266	Ecology Laboratory	Relationships of organisms to their environment and to each other at the organism, population, community, and ecosystem levels.	1-7	UG	Sustainability Focused
BIOL	CAS	282	Genetics	This course surveys principles and processes of genetic inheritance, gene expression, molecular biology, developmental, quantitative, population and evolutionary genetics.	4, 6, 7	UG	Sustainability Focused
BIOL	CAS	283	Genetics Laboratory	This course surveys principles and processes of genetic inheritance, gene expression, molecular biology, developmental, quantitative, population and evolutionary genetics.	4, 6, 7	UG	Sustainability Focused
CHEM	CAS	105	Chemical Principles	Lecture, discussion and laboratory course for majors covering stoichiometry, reactions in aqueous solution, states of matter, electronic structure, thermodynamics, chemical bonding, molecular geometry and intermolecular forces. Emphasis given to writing electron configurations and Lewis diagrams, predicting molecular geometry and properties, mass/mole conversions and solving thermodynamic and gas law problems.	1-3, 6	UG	Sustainability Focused
CLST	CAS	271	Classical Mythology	This course focuses on Greek and Roman literature involving myth and how ancient and modern peoples use traditional narratives, characters, images and conceptions to explore, explain, and experiment with ideas about themselves and their surroundings in their historical, social, cultural and intellectual contexts.	3, 4, 6, 7	UG	Sustainability Focused
CLST	CAS	272	Heroes & Classical Epics	This course centers upon the epics of the ancient Mediterranean world, their nature and significance, and, especially, the concepts of heroes and heroism. Outcome: Students should be able to demonstrate knowledge of ancient epic as a literary genre, what heroes are and why they are featured in epics, and how epics began and evolved to reflect audiences and their social, cultural, political and other concerns, values (such as leadership) beliefs and practices.	3, 4, 6, 7	UG	Sustainability Focused

CMAN	NURS	272	Mental Health Patterns	This course is designed to prepare students in assisting persons (individuals, families, communities) to achieve and maintain optimal mental health	1-7	UG	Sustainability Focused
CMAN	NURS	468	Adv Cncpts Hlth Systems Mgmt	<i>description not available in LOCUS</i>	2, 3, 4, 7	G	Sustainability Focused
CORE	CAS	100	Interpreting Literature	The foundational course of literary studies will require students to read closely and analyze carefully a representative variety of prose, poetry, and drama, master key literary and critical term, and explore a variety of core critical approaches to the analysis and interpretation of literature	1, 2, 3, 7	UG	Sustainability Focused
CORE	CAS	137	Sci. Basis Env. Issues	This course will introduce concepts that form the basis of environmental science, including elemental cycling, energy flow/transformation, and the interconnectivity among atmosphere, lithosphere, hydrosphere and biosphere, and within ecosystems. Ways in which knowledge of these concepts informs policy, management and social perception to produce positive change will also be examined.	1-7	UG	Sustainability Focused
ECON	BUS	328	Environmental Economics	This course applies economic theory to environmental and natural resource problems and policies, investigates the role economic incentives play, and discusses externalities, property rights, common property problems, pollution and pollution control, and renewable and non-renewable resource management.	1-4, 7	UG	Sustainability Focused
ELPS	EDUC	302	Philosophy of Education	Study of major philosophical theories about educational practice, especially as these relate to pedagogical practice, curriculum development, and the response of schools to particular individual, community, and societal interests.	3, 6, 7	UG	Sustainability Focused
ELPS	EDUC	432	Multicul. Social Justice	This course provides an introduction to theory and research related to multiculturalism and social justice. Learning is targeted at increasing students multicultural awareness, knowledge, and skills in the context of higher education practice. Outcomes: Understand social justice conceptual foundations and the various ways in which oppression influences individuals, institutions, and the broader society.	2, 5, 7	G	Sustainability Focused
ENGL	CAS	274	Exploring Shakespeare	This course focuses on the works of Shakespeare as literature and as theatre, covering at least three of the four genres (comedy, history, tragedy, romance). Outcome: Students will be able to demonstrate understanding of the theatrical and poetic works of Shakespeare, such elements of drama as plot, character, theme, imagery, and verse forms, as well as the personal, political and theatrical world in which Shakespeare lived and worked.	1, 2, 4, 6, 7	UG	Sustainability Focused
ENGS	ENGS	102	Engineer Sci Freshman Sem	This seminar offers a shared learning experience with an assignment of a service project and exposure to Industrial Advisory Board members and Loyola administrators and faculty. In addition to providing intellectual enhancement to the program, these seminars give us a time and place to regularly interact. This class is restricted to Engineering Science freshman.	1, 2, 3, 5, 7	UG	Sustainability Focused
GNUR	NURS	407	Social Just Ethics Health Care	This course examines social justice, ethics, and nursing advocacy in healthcare at global, national, and local levels for the doctorally prepared nurse. Social justice and ethical issues in healthcare are analyzed using established theories and frameworks. Recommendations for resolution of social justice and ethical issues will be addressed	2, 4, 5, 7	G	Sustainability Focused
HCAD	HSPH	340	Health Care Policy	<i>description not available in LOCUS</i>	3, 4, 7	UG	Sustainability Focused
HIST	CAS	101	Evol Wst Idea/Inst to 17C	This course traces the early development of Western civilization from the ancient Near East; Greece and Rome; the medieval civilization(s); to the European Renaissance and Reformation	1, 2, 4-7	UG	Sustainability Focused
HIST	CAS	104	Global History since 1500	This course deals with the emergence of the modern world, including such topics as the expansion and intensification of cross-cultural interaction; imperialism, colonialism, and nationalism; the spread of information; capitalism, industrialism, and popular sovereignty; race and ethnicity, gender, and socio-economic status.	1, 2, 7	UG	Sustainability Focused
HIST	CAS	297E	North Amer Enviro Hist	This course surveys the environment and environmentalism in United States history, from the transformation of New England into a farm ecology, the expansion of the cotton South, the settlement of the West, to the rise of industrial cities, suburban sprawl, and the globalization of the economy	1-4, 6, 7	UG	Sustainability Focused
HIST	CAS	459	Environmental History	Environmental history expands the customary framework of historical inquiry, incorporating such actors as animals, diseases, and climate alongside more familiar human institutions and creations.	1, 2, 7	G	Sustainability Focused
HIST	CAS	480	Publ Hist.Method & Theory	<i>description not available in LOCUS</i>	2-7	G	Sustainability Focused
HONR	CAS	204D	Science and Society	Students will examine the ways natural science and social science address a particular issue as well as the effects of science on society. They will learn scientific ways of knowing and organizing knowledge, and demonstrate the capacity to make reasoned and ethical judgments about the impact of science on society.	2, 7	UG	Sustainability Focused
HRER	BUS	413	Compensation	This course examines wage and salary policies and programs in private and public organizations. Legislative and social issues affecting pay decisions, and the alignment of pay policies with the business strategy and other human resource programs are covered	1-3, 6, 7	G	Sustainability Focused
HRER	BUS	422	Global HR Management	This course examines the critical roles of Human Resource professionals throughout the strategic globalization process, as well as the cross-cultural issues that affect organizational dynamics and behaviors central to Human Resource processes, such as staffing, training, motivation, negotiation, team-building, and communication	1-3, 6, 7	G	Sustainability Focused
IES	IES	137	Foundations Env Sci I	This course is the second in a three-course sequence required of all ENVS majors. It will provide the basic scientific grounding needed to intelligently discuss environmental policy and to prepare students for more advanced study in the environmental sciences. It focuses on physical science, especially thermodynamics, energy and climate change.	1, 2, 7	UG	Sustainability Focused
IES	IES	200	Environment Career/Prof.Skills	Introduction to environmental professions and determining skills and individual traits best suited for professions in policy, science, business, community organizing, etc. Begin developing a professional network	1-4, 6, 7	UG	Sustainability Focused
IES	IES	203	Environmental Statistics	This course introduces basic statistics from probability through multiple regression, employing computer programs with ecological, environmental, and relevant social science examples and data sets	3, 6, 7	UG	Sustainability Focused
IES	IES	204	Gender, Health & Environment	Exploration of connections between social justice and environmental health using scientific tools of analysis. Focus on experiences of those at intersection of marginalized social locations. Issues include impacts of modern disposable culture and how socially constructed gender roles affect exposure to environmental health risks while biological sex shapes their impacts	1-3, 6, 7	UG	Sustainability Focused
IES	IES	218	Biodiversity & Biogeography	This course covers the creation and maintenance of biodiversity across taxonomic, temporal and spatial scales. It will provide an overview of the history of biogeography, increase understanding of the evolutionary processes that create biodiversity, the influence of biodiversity on ecosystem services, and the rapid biodiversity loss resulting from human actions.	1-3	UG	Sustainability Focused

IES	IES	223	Soil Ecology	This course introduces the properties, functions, and conservation of soil. Topics include belowground ecosystem services, soil biodiversity, biogeochemical cycles, and conservation, human impacts to soils, and the socioeconomic implications of soil degradation. Lectures, laboratory/field soil testing, field trips, and presentations by experts in sustainable soil management are employed.	1-7 UG	Sustainability Focused
IES	IES	224	Climate Change	This course introduces students to basic principles and knowledge to explain climate change. Students will learn about natural and anthropogenic causes of climate change, the interactions between earth-atmosphere-ocean systems, climate feedback mechanisms, and impacts of climate change on the natural physical environment.	1, 2, 7 UG	Sustainability Focused
IES	IES	227R	Ecology of the Mediterranean	This course examines the ecology of the Mediterranean Sea and how human activity has shaped the present-day ecosystem. Students will learn fundamental ecological concepts including ecosystem functioning, energy flow, matter transformation, and elemental cycles and the human impacts on the Mediterranean environment, including discussion of impact reduction and remediation	1, 2, 3, 5, 7 UG	Sustainability Focused
IES	IES	237	Foundation Env. Sci II	This course is the second in a three-course sequence required of all ENVS majors. It will provide the basic scientific grounding needed to intelligently discuss environmental policy and to prepare students for more advanced study in the environmental sciences. It focuses on physical science, especially thermodynamics, energy and climate change	1-7 UG	Sustainability Focused
IES	IES	238	Found. Environ. Sci. Lab	A lab course designed to be associated with ENVS 237, this course is designed to introduce all ENVS majors to lab safety, basic lab techniques such as use of balances and microscopes, data analysis, and the application of these techniques to the study of environmental science	1, 2, 3, 5, 7 UG	Sustainability Focused
IES	IES	267	Bird Conservation and Ecology	This engaged-learning course provides an introduction to the theory and practice of avian conservation, ecology and management. Field trips for viewing birds in the wild, observing behavior and collecting data on habitat assessments are highlighted. Students participate in a community service project to gather data for avian conservation and management	1, 3, 5, 6, 7 UG	Sustainability Focused
IES	IES	275	Chemistry of Environment Lab	Basic techniques for chemical analysis of environmental samples, including air, water and soil. Learn to use electronic data acquisition systems and further develop scientific writing skills	1, 3, 5, 6, 7 UG	Sustainability Focused
IES	IES	279	Climate and History	Explores the role of climate in history, from the emergence of homo sapiens to recent anthropogenic climate change. Major topics include the social impact of climate variability, sources of resilience, origins of scientific knowledge, and the use of historical knowledge in the present.	1-7 UG	Sustainability Focused
IES	IES	280	Principles of Ecology	The purpose of this course is to foster an in-depth understanding of ecology, the study of relationships between organisms and the environment at organizational scales ranging from genes, individuals, and populations to communities, ecosystems, and landscapes. Topics include population dynamics, species interactions, community dynamics, food webs, ecosystem functions, and landscape ecology with a strong emphasis on scientific inquiry and data interpretation. Restricted to majors within IES	1-7 UG	Sustainability Focused
IES	IES	281V	Humans Environ. Viet Nam	This course is intended to provide students with deep and practical understandings of three interrelated concepts: sustainability, conservation, and biodiversity. Students will also learn about the current condition of Vietnam's environment, causes of environmental degradation in Vietnam, and current efforts towards environmental sustainability in Vietnam.	1, 2, 3, 5, 7 UG	Sustainability Focused
IES	IES	283	Environmental Sustainability	Examines the impact of humans as consumers on the environment and how these interactions affect the probability of establishing sustainability for human and non-humans on Earth	1-7 UG	Sustainability Focused
IES	IES	286	Ecology Lab	This course will allow students to develop experience and skills employed in ecological studies, with an emphasis on field work, laboratory analysis, and hypothesis testing. Topics for lab exercises will correspond closely with material from Ecology (ENVS 280) lecture. Course does not satisfy requirements for BIOL major.	1, 2, 3, 5, 7 UG	Sustainability Focused
IES	IES	286S	Principles of Ecology Lab	Course content includes lab skills and analytical techniques commonly employed in ecological studies; emphasizes sampling, research design, field work, laboratory technique, data analysis, project development, hypothesis testing, and scientific report writing	1, 2, 3, 5, 7 UG	Sustainability Focused
IES	IES	297	N American Environ History	This course surveys the environment and environmentalism in United States history, from the transformation of New England into a farm ecology, the expansion of the cotton South, the settlement of the West, to the rise of industrial cities, suburban sprawl, and the globalization of the economy.	1-7 UG	Sustainability Focused
IES	IES	301	Environmental Health	Epidemiology is the study of the distribution and determinants of disease in populations. This course is designed as an introduction to environmental public health issues, laws, regulations, research, and advocacy. Environmental factors including biological, physical and chemical factors that affect the health of a community will be presented. The environmental media (air, water and land) and various community exposure concerns will also be presented. The course will utilize available internet resources to access environmental data, and focus related research. A team project will be completed requiring literature review and presentation and critical assessment of a successful (or unsuccessful) environmental advocacy campaign	1-4, 6, 7 UG	Sustainability Focused
IES	IES	310	Intro to Environ Law & Policy	This introduction to environmental law surveys some critical federal environmental statutes, rules, and regulations in the United States; important case law decided under those statutes; interaction between federal, state, and local jurisdictions; and impacts on air, land, water, and natural resources.	1, 2, 7 UG	Sustainability Focused
IES	IES	312	Water Law & Policy	This course looks at how the law allocates and protects one of our most crucial natural resources -- water. Understanding development and regulation of water ownership and use and how those decisions impact current environmental and socio-economic issues.	1-4, 6, 7 UG	Sustainability Focused
IES	IES	313	Energy Law & Policy	This course looks at the laws that shape traditional energy production and the growing regulation of renewable and sustainable energy.	1-4, 6, 7 UG	Sustainability Focused
IES	IES	320	Conservation Biology	Students will learn to apply ecological and evolutionary biological principles to the preservation of wild plant/animal species, and to the preservation/management of ecosystems. Conservation approaches and challenges for all types of ecosystems, will be covered, with emphasis on contemporary threats to biodiversity, including habitat fragmentation, invasive species, and climate change.	1-4, 6, 7 UG	Sustainability Focused
IES	IES	321	Conservation Biology Lab	Students will learn to apply ecological and evolutionary biological principles to the preservation of wild plant/animal species, and to the preservation/management of ecosystems. Conservation approaches and challenges for all types of ecosystems, will be covered, with emphasis on contemporary threats to biodiversity, including habitat fragmentation, invasive species, and climate change.	1-4, 6, 7 UG	Sustainability Focused
IES	IES	330	Restoration Ecology	This course provides a theoretical and practical basis for the increasing global efforts to reverse damage caused by humans to ecosystems and species, emphasizing the many perspectives (e.g., ecological, social, political, engineering) that must be considered to develop, implement, and assess restoration projects across a range of ecosystem types.	1-4, 6, 7 UG	Sustainability Focused
IES	IES	331	Restoration Ecology Lab	This course provides a theoretical and practical basis for the increasing global efforts to reverse damage caused by humans to ecosystems and species, emphasizing the many perspectives (e.g., ecological, social, political, engineering) that must be considered to develop, implement, and assess restoration projects across a range of ecosystem types.	1-4, 6, 7 UG	Sustainability Focused

IES	IES	335	Ecological Economics	Ecological Economics is a transdisciplinary course that takes a systems approach to the relationship between planetary stewardship, social justice, and the economy to design a prosperous and desirable future for humans on a finite planet. Ecological economics fuses economic theory and sustainability science to generate new solutions for today's challenges.	1, 2, 7 UG	Sustainability Focused
IES	IES	336	Biomimicry: Design	This course provides an introduction to biomimicry (or biomimetics) and the application of biomimicry design principles. Biomimicry is the design of business products, processes, and systems modeled after nature's wisdom. In biomimicry, nature serves as the design inspiration for sustainable solutions to solve complex human problems.	1-3 UG	Sustainability Focused
IES	IES	338	Climate Change and Human Health	This course provides an introduction overview of the health consequences associated with climate change and the local, federal, and global response to mitigate these negative health outcomes. During the course students will be expected to incorporate course content and develop a realistic response public health plan to climate change for a locality of their choosing.	1, 2, 7 UG	Sustainability Focused
IES	IES	340	Natural History of Belize	This Study Abroad field course is designed to build on the foundations learned in Ecology, Environmental Science, and Anthropology classes by examining the biodiversity and tropical ecosystems of Belize, by exploring the cultural traditions of some of its peoples, particularly the Mayans; and learn how local communities are involved in protecting and sustaining ecological and natural sites through community based conservation and sustainability practices	1-4, 6, 7 UG	Sustainability Focused
IES	IES	345	Neotropical Conservation	This course provides an introduction to conservation ecology in Neotropical ecosystems via classroom sessions and experiential learning activities during a Spring-Break field trip to Belize. Students will gain experience in environmental monitoring and biological survey methods. Ecosystems studied: coral reefs, mangrove forests, subtropical rain and dry forests, savannas, rivers, wetlands	1-7 UG	Sustainability Focused
IES	IES	350B	STEP: Biogas	'STEP: Biogas' is an interdisciplinary and hands-on course in which students learn about a relevant and complex environmental problem pertaining to biogas production, processing and transport and then develop and implement projects that address the problem on campus and in the local community.	1, 2, 3, 4, 7 UG	Sustainability Focused
IES	IES	350C	STEP: Climate Action	Consideration of environmental, political, economic, historical, and cultural contexts of climate change. Examination of actions occurring at varying geographic scales to mitigate and/or adapt to climate change impacts. Problem- and solution-based learning of how to invest resources effectively to deal with a changing climate and its consequences	1-7 UG	Sustainability Focused
IES	IES	351	Sustainability Concepts	Examines environmental, economic, social and political impacts of sustainable practices on general public and global and local organizations. Provides students with understanding of importance to corporations and other entities of measuring, monitoring, and reporting resource use to customers and stakeholders.	1-7 UG	Sustainability Focused
IES	IES	363	Sustainable Business Mgmt	Course introduces students to the emerging field of sustainability in business and the growing focus on the social, environmental, and economic performance of businesses. The course presents the scientific, ethical, and business cases for adopting sustainability.	1-7 UG	Sustainability Focused
IES	IES	363	Sustainable Business Mgmt	Course introduces students to the emerging field of sustainability in business and the growing focus on the social, environmental, and economic performance of businesses. The course presents the scientific, ethical, and business cases for adopting sustainability. This course fulfills a MGMT elective	1-7 UG	Sustainability Focused
IES	IES	383	Human Dimension of Conserv.	This course will increase student knowledge of the social, political, economic, psychological, and cultural dimensions that influence the success of conservation projects and develop skills in conducting human dimensions-inquiry using surveys, interviews, observation, and/or participatory methods. It will contribute to preparation for employment in the conservation field and/or graduate study.	2-7 UG	Sustainability Focused
IES	IES	385	Introduction to Global Health	This course introduces students to epidemiological and policy aspects of global health with a focus on health disparities at the international level	1-7 UG	Sustainability Focused
IES	IES	390	Integrative Seminar	This course requires students to focus on a specific environmental issue or theme, integrating multidisciplinary perspectives, through individual or group presentations, discussion, and analysis of presentations by outside speakers	1-3, 6 UG	Sustainability Focused
IES	IES	401	Sustain Systems - Sci Perspect	This required core course provides an integrated overview of environmental science and sustainability which connect to sustainable development and ecological economics goals to define a just and safe space for the equitable distribution of life's essential re-sources that does not exceed the Earth's capacity to provide and replenish them	1-7 G	Sustainability Focused
IES	IES	410	Intro to Environ Law & Policy	This introduction to environmental law surveys some critical federal environmental statutes, rules, and regulations in the United States; important case law decided under those statutes; interaction between federal, state, and local jurisdictions; and impacts on air, land, water, and natural resources.	1-7 G	Sustainability Focused
IES	IES	412	Water Law & Policy	This course looks at how the law allocates and protects one of our most crucial natural resources – water. Understanding development and regulation of water ownership and use and how those decisions impact current environmental and socio-economic issues	1-7 G	Sustainability Focused
IES	IES	413	Energy Law & Policy	This course looks at the laws that shape traditional energy production and the growing regulation of renewable and sustainable energy.	4, 7 G	Sustainability Focused
IES	IES	480	Intro to GIS	Geographic Information Systems (GIS) is a mapping tool that allows users to create interactive searches, analyze spatial information, edit data and maps, and present the results visually. The course includes lecture, laboratory, and project components. Students will learn basic GIS skills and applications and work on projects with community organizations	4, 7 G	Sustainability Focused
IES	IES	481	Advanced GIS Applications	Students in this course will learn tools required to solve complex environmental problems and gain experience with spatial analysis, network analysis, 3-D analysis, GIS modeling, geostatistics, and other ArcGIS extensions. Students will also learn about internet-based mapping for dissemination of spatial data	4, 7 G	Sustainability Focused
IPSD	IPS	416	Christian Origins	This course serves as an introduction to and overview of the New Testament. Students explore the world of Jesus and his interpreters from both a historical and a biblical perspective and learn about the religious and cultural world of Palestinian Judaism during the Roman occupation.	2-7 G	Sustainability Focused
IPSD	IPS	417	Literature of Ancient Israel	This course is an introduction to the Old Testament, the sacred literature of Christians and Jews. We will examine texts from the Pentateuch, historical, prophetic, and wisdom books. In order to reconstruct the meaning of texts for their original audiences, we will employ methods of modern critical biblical scholarship	2-7 G	Sustainability Focused
IPSD	IPS	551	Catholic Social Ethics	This course focuses on the tradition and practice of Catholic social thought. Students will become familiar with the documentary tradition of Catholic social teaching, as well as the ways that Catholic social thought has been embodied and advanced through the lives of Catholic activists and liberation theology. Particular attention will be given to history, texts, methodology, and significant figures in the tradition	2, 4, 6 G	Sustainability Focused
IPSD	IPS	572	Ignatian Spirituality	This course will examine the text and practice of the Spiritual Exercises of Ignatius Loyola which is so effective and popular across diverse spiritual and religious traditions today. The mysticism of everyday life is rooted in the Exercises which invite all "to find God in all things."	1-4, 6 G	Sustainability Focused

IPSD	IPS	610	Foundations of Social Justice	This course explores the philosophical, ethical and theological foundations for social justice with a particular emphasis on Catholic Social Teaching and Catholic social ethics, addressing the practice of justice with attention to concrete dilemmas which confront Christians in their efforts to do justice.	2-7	G	Sustainability Focused
IPSD	IPS	625	Soc Ethics:Poltics&Global Econ	Economic institutions and issues of global justice are considered in the writings of philosophers, economists and socio-political theorists. Students effectively analyze institutional contexts of social justice issues and understand foundational local, national, and international justice issues linked to the political, economic, and social arenas	1-4	G	Sustainability Focused
ISSCM	BUS	332	Operations Management	Introduction to concepts and methods for managing production and service operations. Topics include demand forecasting, aggregate and capacity planning, inventory management, facility layout and location, just-in-time, managing quality, project planning, resource allocation, and logistics.	3, 4, 7	UG	Sustainability Focused
ISSCM	BUS	480	Intro to Operations Mgmt	Introduction to concepts and methods for managing operations in manufacturing and service organizations. Topics typically include forecasting, capacity and aggregate planning, material requirements planning, scheduling, facility layout and location, inventory management, just-in-time, total quality management, project planning, and logistics.	1-3, 6, 7	G	Sustainability Focused
ISSCM	BUS	486	Global Logistics	Explores the current business revolution in global logistics and partnering by members of the supply chain to more effectively provide products and services to customers.	3, 4, 7	G	Sustainability Focused
LAWD	LAW	102	History and Practice	<i>description not available in LOCUS</i>	1-7	UG	Sustainability Focused
LAWD	LAW	104	Intl Developmnt Architecture	This course will prepare students to provide rule of law advice, which takes into account the complex framework of national and international legal and institutional arrangements and policies, which has gradually been established since 1945, especially as such framework relates to rule of law advisory work. The course will begin with a review of the Bretton Woods institutions and regional international financial institutions (IFIs) from both a legal and functional perspective to clarify the role of such organizations in international development and how they operate. It will analyze the loan and program portfolios of these organizations to develop an understanding of the direct role, which the IFI's are playing in the financing of rule of law projects and programs.	1-3, 5-7	UG	Sustainability Focused
LAWD	LAW	105	Sustain Dev Through Intl Comm	<i>description not available in LOCUS</i>	1-7	UG	Sustainability Focused
LAWD	LAW	106	Rule of Law Prog & Prop Prep	This course will improve the understanding and skills of students in the area of project design and the preparation of proposals related to rule of law assistance. Accordingly, the course will develop the students' skills in undertaking the principle steps in the design process. Building on the course on needs assessments, the course will begin with effective needs and problem analysis and then analyze the process of identification of goals, objectives and activities; project inputs and expected outputs, selection of appropriate project partners; the identification of performance indicators, design of a monitoring and evaluation plan, design and structuring of a proposal; prospective donor identification and the designing of a plan for project management and reporting. The course will include instruction and practice in the building of logical project frameworks, the principal analytic tool used for project design in the international development community, the establishment of the credentials of the proposer to undertake the project and the design and preparation of a proposal for a project in a given jurisdiction	5-7	UG	Sustainability Focused
LAWD	LAW	175	Natural Resource Law	This is the broad survey course on Natural Resources Law. We will explore the protection and multiple uses of natural resource systems; regulation of federal public lands; forests; the National Park System; the Wilderness Preservation System; tribal lands; fish and wildlife management (including the Endangered Species Act and other sources of protection for fisheries and marine mammals); and rangelands. There will be a take-home final exam and in-class presentations	2, 3, 6, 7	UG	Sustainability Focused
LAWD	LAW	294	International Human Rights	This course examines the civil, political, economic and other rights secured to individuals and groups by international law. It examines the major source of those rights, including the United Nations and regional organizations, and it discusses the substantive content of those rights. Particular attention is given to how those rights are enforced, from judicial decisions in national and international tribunals through other mechanisms developed in various international and regional settings, including the role of NGOs. No prerequisite	2, 3, 6, 7	UG	Sustainability Focused
LAWD	LAW	339	Biodiversity&Ecosystem Mgmt	This course will review the issues impacting biodiversity and ecosystems in the 21st century, as well as the policy choices that federal, state, and local governments have made to address these concerns. We will cover biodiversity law, ecosystem management methods, and the emerging relationships these areas have with climate change law and renewable energy development. The grade will be based on a 20-25 page paper, presentation of that paper, and class participation.	2, 3, 6, 7	UG	Sustainability Focused
LAWD	LAW	387	Intl Environmental Law	<i>description not available in LOCUS</i>	2, 3, 6, 7	UG	Sustainability Focused
MARK	BUS	201	Fundamentals of Marketing	This course develops an understanding of the marketing systems by which organizations plan, price, promote and distribute products and services to selected target markets	1, 2, 5	UG	Sustainability Focused
MARK	BUS	320	MARK Env. Sustainability	<i>description not available in LOCUS</i>	1, 2, 3, 7	UG	Sustainability Focused
MARK	BUS	460	Marketing Management	This course develops a broad understanding of the marketing principles that undergird successful marketing strategies and marketing plans with special attention given to international and ethical considerations.	1-7	G	Sustainability Focused
MGMT	BUS	201	Managing People & Organizations	This course introduces students to the dynamics of human behavior in the workplace through the study of such topics as perception, learning, motivation, leadership and group behavior	2, 3, 5, 7	UG	Sustainability Focused
MGMT	BUS	341	Ethics in Business	This course focuses on ethical issues in the world of business and commerce. This course will address a number of interrelated questions: What are the rights and obligations of business in society? Can businesses "do good" and "do well"? Is business ethics a viable goal or an unachievable ideal?	1-7	UG	Sustainability Focused
MGMT	BUS	441E	Bus. Ethics & Resp. Leadership	This course focuses on ethical issues in the world of business and commerce. This course will address a number of interrelated questions: What are the rights and obligations of business in society? Can businesses "do good" and "do well"? Is business ethics a viable goal or an unachievable ideal?	1-7	G	Sustainability Focused
MGMT	BUS	446	Intrntl Business Ethics	This is an advanced business ethics course that addresses the ethical issues that arise in the global business environment, including the standards for the operation of multinational corporations and the ethical perspectives of managers in different countries	2, 6, 7	G	Sustainability Focused
MGMT	BUS	460E	Values Based Leadership	This course is focused on values-based leadership. This is an umbrella term that covers a wide range of approaches to leadership, all of which have at their foundation a set of values or principles, or at least an examination of one's values and beliefs	2, 3, 5, 7	G	Sustainability Focused
MGMT	BUS	472	Organizational Change&Dev	This course focuses on the manager's role as a change agent in implementing effective change management and organizational development	2, 3, 5, 7	G	Sustainability Focused

MGMT	BUS	485	Social Enterprise	Social enterprise seeks to create ventures that provide critical social services in innovative ways using the concepts and methods of business. This course aims to prepare students to engage in social enterprise by focusing on how to create social value by business means; how to start and sustain an entrepreneurial social venture; how to scale social innovation and grow an organization; how to obtain funding and generate earned revenue; how to adopt an appropriate legal governance structure and tax status; and how to measure, document, and communicate social impact.	2, 3, 5, 7	G	Sustainability Focused
PBHS	HSPH	401	Environmental Health	<i>description not available in LOCUS</i>	1, 2, 3, 6, 7	G	Sustainability Focused
PHIL	CAS	181	Ethics	This course is a general introduction to ethics and moral philosophy	1-2, 4, 6, 7	UG	Sustainability Focused
PHIL	CAS	182	Social&Political Philosophy	This course will investigate one of the central questions of philosophy and social theory: how we, as human beings, should live together	1-2, 4, 6, 7	UG	Sustainability Focused
PHIL	CAS	273	Philosophy of Science	This course examines the nature of scientific knowledge and its claim to possess a distinctive method of inquiry.	1, 2, 3, 6, 7	UG	Sustainability Focused
PHIL	CAS	287	Environmental Ethics	This course introduces students to ethical reasoning and to various topics in environmental ethics. Topics may include: pollution, animal rights, and natural resources	1-7	UG	Sustainability Focused
PHIL	CAS	288	Culture and Civilization	This course examines the nature, causes, and possible future development of human culture and civilization.	1, 2, 3, 6, 7	UG	Sustainability Focused
PHYS	CAS	101	Liberal Arts Physics	For non-science majors. Selected topics from classical and modern physics emphasizing beauty, symmetry, and simplicity. Contemporary issues of physics and society.	1, 2, 3, 7	UG	Sustainability Focused
PLSC	CAS	102	Int Rel Age of Globalization	Competing perspectives on international politics and global issues such as North-South relations, human rights, war and peace, population growth, and environmentalism	1-3, 6, 7	UG	Sustainability Focused
PLSC	CAS	321	Con Law-Powers of Govt	The Supreme Court's role in allocating power among the three branches of the national government and between the state and federal governments	1-3, 6, 7	UG	Sustainability Focused
PLSC	CAS	354	Global Environmental Pol	Examines the linkages between the world's natural environment and the global political system.	1-3, 6, 7	UG	Sustainability Focused
PLSC	CAS	392	Environmental Politics	Examines the linkages between the world's natural environment and the global political system	1-3, 6, 7	UG	Sustainability Focused
PSYC	CAS	100	Psyc Perspec Globalization	Globalization from a psychological perspective. Applying core psychological concepts, research and theory to cross-cultural issues of behavior and development. Topics may include human rights of children, human trafficking, immigration, moral issues of international trade, parenting across cultures	1-7	UG	Sustainability Focused
PSYC	CAS	275	Social Psychology	Introduction to the field of social psychology; including topics such as social cognition, impression formation, social influence, attitude formation and change, stereotyping and prejudice, aggression, pro-social behavior, and group behavior	2, 3, 4, 6	UG	Sustainability Focused
SOCD	SOC	200	Communication & New Media	This course explores the ways technology affects personal, cultural and mass communication through examining the historical, societal and ethical implications of newer and interactive forms of media.	2, 3, 4, 6	UG	Sustainability Focused
SOCD	SOC	201	Media Theory & Criticism	This course is an introduction to the study of traditional mass media and new media from a critical and interpretive perspective.	2, 3, 4, 6	UG	Sustainability Focused
SOCD	SOC	260	Environmental Journalism	The mission of environmental journalism is to raise public awareness about environmental news and issues. It is about being ethical, accurate, fair, and clear, whether reporting, investigating, or advocating for change	1-7	UG	Sustainability Focused
SOCD	SOC	306	Environmental Advocacy	This course explores the rhetorical means by which citizens influence the policies and practices affecting our natural and human environments. The focus is on current controversies	1-7	UG	Sustainability Focused
SOCL	CAS	101	Society in a Global Age	This is a foundational course in the social sciences which explores the effect of globalization on everyday life in the United States and elsewhere, using the basic perspectives and methodologies of sociology.	1, 4, 6, 7	UG	Sustainability Focused
SOCL	CAS	205	Sociological Thought	This course examines classical and contemporary sociological theories and uses them as frameworks for understanding modern society. Such social theories attempt to explain and understand the world, as well as inspire further research and theory	1, 4, 7	UG	Sustainability Focused
SOCL	CAS	226	Sci.Tech & Society	This course serves as a broad introduction to the social study and analysis of science and technology in society. It examines how scientific knowledge and technologies are created and constructed and how they influence and are influenced by society.	2, 7	UG	Sustainability Focused
SOCL	CAS	272	Environmental Sociology	This course examines the distinctively social aspect of the relationship of people to their environments, both built and natural.	1-7	UG	Sustainability Focused
SOCL	CAS	276	Sociology & Politics of Food	Explores the impact of globalized economic, political, and social relationships through the prism of food. Considers the cultural and ideological dimensions of food, the structure of food production and consumption, and responses to the global food system	1-3, 7	UG	Sustainability Focused
SOWK	SSW	201	Social Welfare & Social Work I	This course examines social welfare problems, the system of social welfare, and its interrelationships with direct practice and the delivery of services. Particular emphasis is placed on the examination of different political and economic conceptions, as well as the ways in which they shape social programs and social work practice	1-3, 6, 7	UG	Sustainability Focused
SOWK	SSW	735	Loss Grief and Dying	Loss and grief are part of the human experience. This course explores these through a developmental life span approach that includes theories and models of grief as well as methods for practice. Hosting conversations on dying well, advance planning, and use of hospice and palliative care with clients are addressed .	1, 5, 7	G	Sustainability Focused
SOWK	SSW	818	Research Methodology	Building upon a basic understanding of research, this course provides a comprehensive overview of the advanced research process in social work, emphasizing question development, generation of hypotheses, principles of measurement, appropriate application of statistical measures, and methods of data collection/reduction. Students can articulate and understand the relationship between the research process, clinical theory development and practice advancement at course conclusion	1, 2, 6	G	Sustainability Focused
SPS	SPS	335	Law & Regulations-Org. Leaders	<i>description not available in LOCUS</i>	2, 3, 4, 6, 7	UG	Sustainability Focused

THEO	CAS	100	Christian Theology	This course is an introduction to reflection on and analysis of the Christian theological tradition. Students will be able to demonstrate understanding of the tasks of Christian theology in its efforts to understand the human situation from the perspective of faith, various challenges to theology in the contemporary world, and will focus on one or more current theological issues.	2, 3, 4, 6	UG	Sustainability Focused
THEO	CAS	185	Christian Ethics	Introduction to Christian Ethics is a core course that explores the major sources, methods, and insights of Christian social and theological ethics. Particular attention is given to Roman Catholic thought. The course will concentrate on the foundational sources in Christian ethics and examine the moral significance of major theological themes and affirmations	1-4, 6, 7	UG	Sustainability Focused
THEO	CAS	186	Global Religious Ethics	<i>description not available in LOCUS</i>	1-3, 6	UG	Sustainability Focused
THEO	CAS	266	Church & Global Cultures	This course provides an introduction to ways in which the Christian churches, and primarily the Roman Catholic Church, understand and enact their identity in relation to the secular world of culture, economics, and politics, both nationally and globally	1, 2, 4, 7	UG	Sustainability Focused
THEO	CAS	293	Christian Marriage	This course introduces candidates (students) to the discipline and culture of science; provides experiences that engage candidates in the teaching and learning of science across varied school and non-school contexts; develops knowledge and skills to teach science through an inquiry approach and integrate writing. Co-Requisite: TLSC 232	1-5, 7	UG	Sustainability Focused
ACCOM	ARR	101	Oral Comm. & Presentation	This course is designed to supply students with an understanding of critical thinking practices, foundational tenets of communication theory, the skills of public address and persuasion, the role of visual aids in effective presentation, and a sense of the social responsibility that comes with the capacity for communication.	4, 7	UG	Sustainability Related
ACCT	BUS	308	Acctq Information Systems	Included among the topics covered in this course are the primary accounting cycles, accounting information system internal controls, and selective fraud issues. Students will also build flowcharting skills and gain experience working on an enterprise resource planning system (ERP) with real-world company data.	2	UG	Sustainability Related
ACCT	BUS	409	Audit I	This course introduces the student to the environment in which Public Accounting exists as well as the standards, both AICPA and PCAOB, which firms must follow in rendering audit and assurance services. The course covers both the theoretical and practical issues involved in planning an engagement, risk assessment and the audit risk model, evidence gathering and internal control policies and procedures. The audit of major transaction cycles (i.e. the revenue cycle) and account groups (i.e. Cash) are then covered highlighting internal specific control policies, testing of controls and substantive audit procedures to gather evidence. Study of appropriate AICPA and PCAOB professional standards is an integral part of this course.	4	G	Sustainability Related
ACISC	ARR	102	Environment Process & Methods	This course examines scientific issues underlying a series of significant threats to the planet. These include the loss of biodiversity, ensuring access to a stable supply of food and water for all of the Earth's inhabitants, climate change, and the demands for energy and other resources. Students will also investigate possible responses to these planetary threats	7	UG	Sustainability Related
ACPHI	ARR	130	Philosophy and Persons	This course examines the way philosophy looks for fundamental characteristics that identify life as a properly human life, asks about its ultimate meaning or purpose, and raises questions about what counts as a good life	1, 4	UG	Sustainability Related
ACPHI	ARR	281	Ethics	This course is a general introduction to ethics and moral philosophy	1, 4	UG	Sustainability Related
ACTHE	ARR	107	Intro to Religious Studies	This course is an introduction to the contemporary field of religious studies	3, 4	UG	Sustainability Related
ACUNI	ARR	101	First Year Seminar	This course introduces students to college life, especially that of an Arrupe student. The course focuses on Ignatian spirituality, community building, goal setting and attainment, academic success strategies, and task initiation	4	UG	Sustainability Related
ANTH	CAS	101	Human Origins	This course explores the study of the biological history of the human species from its inception to the establishments of food producing societies.	2	UG	Sustainability Related
ANTH	CAS	332	Language, Race, and Inequality	This course addresses how and why languages and speakers are associated with racialized stereotypes, and how linguistic discrimination operates in U.S. culture today. In-depth case studies examine language and race in education, mass media, material culture, and everyday interaction. Critical perspectives on sociolinguistic norms and relationships between language, Whiteness, and power are also included.	7	UG	Sustainability Related
APHS	HSPH	101	Intro to Exercise Physiology	<i>description not available in LOCUS</i>	3	UG	Sustainability Related
APHS	HSPH	425	SP:PubHlthNutrRsrchProfDev Mark	<i>description not available in LOCUS</i>	3, 7	G	Sustainability Related
BHNR	BUS	338	Bus Mgmt: Global & Social Pers	<i>description not available in LOCUS</i>	3, 7	UG	Sustainability Related
BIOL	CAS	102	General Biology II	A continuation of Biology 101. Fundamental principles of Biology including: evolutionary theory; general principles of ecology; study of plant structure and function; and comparative animal physiology.	2	UG	Sustainability Related
BIOL	CAS	112	General Biology II Lab	A continuation of Biology 101. Fundamental principles of Biology including: evolutionary theory; general principles of ecology; study of plant structure and function; and comparative animal physiology.	2	UG	Sustainability Related
BIOL	CAS	215	Ornithology	An introduction to the biology of birds including the topics of anatomy, physiology, behavior, ecology and evolution. Includes some field trips to learn how to identify species and to collect behavioral information.	3, 7	UG	Sustainability Related
CHEM	CAS	106	Basic Inorganic Chemistry	Laboratory course designed to illustrate fundamental models and theories in chemistry with an emphasis on significant digits, calculations, and analysis and discussion questions.	3, 7	UG	Sustainability Related
CHEM	CAS	361	Principles of Biochemistry	This course examines the structural/ functional relationships in proteins, nucleic acids, carbohydrates and lipids as well as their metabolic pathways. CHEM 361 is cross-listed with BIOL 366.	2, 7	UG	Sustainability Related
CMAN	NURS	380	Community Health	Nursing and public health concepts provide theoretical basis for care of families, aggregates, and communities outside institutional settings. Role of community health nurses in caring for specific aggregates is described. Clinical experiences are provided for application of concepts and implementation of nursing interventions in a variety of community settings.	6	UG	Sustainability Related
CMAN	NURS	380L	Community Health: Lab	Nursing and public health concepts provide theoretical basis for care of families, aggregates, and communities outside institutional settings. Role of community health nurses in caring for specific aggregates is described. Clinical experiences are provided for application of concepts and implementation of nursing interventions in a variety of community settings.	6	UG	Sustainability Related
COMP	CAS	125	Visual Information Processing	This course, intended primarily for non-majors, provides an introduction to computer programming using a language well-suited to beginning programmers and practical applications, e.g., Visual Basic.Net.	7	UG	Sustainability Related
COMP	CAS	250	Intro Sci and Tech Comm	This course trains students in writing clear, readable, and well-organized technical communications, including presentations, end-user documentation, internal project documentation, and scientific papers	7	UG	Sustainability Related

COMP	CAS	312	Open Source Software Practicum	This course will cover the fundamentals of Free and Open Source software development. Topics to be addressed include licensing, Linux, typical software development tools, applications, and techniques for managing remote servers.	3.7	UG	Sustainability Related
CORE	CAS	101	First Year Seminar	This class is intended to help first year students enhance their academic skills and social integration into Loyola University Chicago.	4	UG	Sustainability Related
CORE	CAS	102	Loyola Seminar	<i>description not available in LOCUS</i>	7	UG	Sustainability Related
DFPA	CAS	101	Music:Art of Listening	Focus is on the acquisition and enhancement of listening skills through direct experience of musical works along with an examination of cross-cultural similarities and differences among musical styles. Concert attendance is required.	2	UG	Sustainability Related
DFPA	CAS	115	Foundations of Photography	An introduction to the equipment, processes and aesthetics of photography as an art form and visual communication. Covering camera operation, exposure meter, lens characteristics, file management, image corrections, and inkjet printing. Equally emphasized are photographic aesthetics, photography as communication, individual expression, and visual literacy.	6.7	UG	Sustainability Related
ECON	BUS	303	Microeconomics	This course is a detailed study of consumer and firm behavior, market structures, and the elementary propositions concerning welfare economics. Outcome: The students will develop analytical skills to understand and predict consumer and firm behavior, understand the underlying pinning of antitrust legislation and dynamic market strategies.	2.3	UG	Sustainability Related
ECON	BUS	325	Econ of Developmnt&Growth	This course describes and analyzes the problems and policy issues facing developing countries and the third world with respect to their economic and social policies and programs.	2.6	UG	Sustainability Related
ELPS	EDUC	219	American Education	This course examines the history, aims, organization, and control of public and private schools in the United States. Emphasis is placed on the historical examination of issues of diversity, inclusion and exclusion as they relate to education.	7	UG	Sustainability Related
ENGL	CAS	288	Nature in Literature	This course focuses on the relationship of human beings and the environment in which they function, as represented in a variety of literary works.	3.7	UG	Sustainability Related
ENGL	CAS	326	Plays of Shakespeare	This course is an advanced study of selected plays as theatre and as literature. Topics may include Shakespeare's life, sources, and influence; background of Early Modern literature and drama; Shakespeare's theatre; the tradition of Shakespeare criticism.	3	UG	Sustainability Related
ENGS	ENGS	101	Intro to Engineering Design	This course is the first of four engineering design courses in the Engineering Science curriculum. Major topics in this course include engineering estimation, three dimensional computer-aided design, 2k factorial design, teamwork, engineering ethics, requirement specifications, and design iteration	1.7	UG	Sustainability Related
ENGS	CAS	361	Fund EnvE	This is the first of three Specialization courses in Environmental Engineering. Topics include aquatic chemistry, chemical thermodynamics and kinetics, environmental soil and biogeochemistry, environmental organic chemistry, surface and groundwater hydrology, atmospheric processes, and fate and transport modeling of contaminants in natural and engineered systems.	3.7	UG	Sustainability Related
ENGS	CAS	361L	Fundamentals EnvE Lab	This is the first of three Specialization courses in Environmental Engineering. Topics include aquatic chemistry, chemical thermodynamics and kinetics, environmental soil and biogeochemistry, environmental organic chemistry, surface and groundwater hydrology, atmospheric processes, and fate and transport modeling of contaminants in natural and engineered systems.	3.7	UG	Sustainability Related
ENGS	CAS	362	Water and Wastewater Eng	Theoretical and conceptual design of systems for treating municipal wastewater and drinking water which include reactor theory, process kinetics, and models. Physical, chemical, and biological processes are presented, including sedimentation, filtration, biological treatment, disinfection, and sludge processing. Re-use of water and waste products are also covered.	3.7	UG	Sustainability Related
ENGS	CAS	383	EnvE Capstone Design I	major design experience based on the knowledge and skills acquired in earlier course work and incorporating engineering standards and multiple realistic constraints. Each group is assigned an environmental engineering industry-sponsored design problem to solve. During the semester, specific environmental design and regulation case studies will be introduced.	3.7	UG	Sustainability Related
ENGS	ENGS	393	ENVE Capstone Design II	Second semester of a major design experience based on knowledge and skills acquired in earlier course work and incorporating appropriate engineering standards and multiple realistic constraints. Each group continues work on the industry-sponsored design projects assigned in ENGR 383. Environmental engineering or professional development topics are also introduced.	3.7	UG	Sustainability Related
FINC	BUS	337	Bankng Money-Capital Mark	Introduction to financial markets and institutions and to the Federal Reserve and monetary policy.	3.7	UG	Sustainability Related
GNUR	NURS	402	Ethics for Health Professional	<i>description not available in LOCUS</i>	4.7	G	Sustainability Related
GSP	GMED	404	Biomed Ethics and Law	<i>description not available in LOCUS</i>	4.7	G	Sustainability Related
GSP	GMED	411	Public Health Ethics	<i>description not available in LOCUS</i>	4.7	G	Sustainability Related
GSP	GMED	500	Intro to HC Mission Ldrshp	<i>description not available in LOCUS</i>	5.7	G	Sustainability Related
HIST	CAS	210	Intro Latin American History	This course explores the formation of modern Latin America by examining the region as a global nexus where ideologies, cultures, peoples, and political entities have conjoined and clashed from the fifteenth century to the present.	1.3	UG	Sustainability Related
HIST	CAS	410	Topics	<i>description not available in LOCUS</i>	4.7	G	Sustainability Related
HIST	CAS	461	Twentieth Century America	<i>description not available in LOCUS</i>	2	G	Sustainability Related
HONR	CAS	301	Moral Responsibility	<i>description not available in LOCUS</i>	3.7	UG	Sustainability Related
HRER	BUS	453	Incentive Pay& Empl Benfit Prq	<i>description not available in LOCUS</i>	4.7	G	Sustainability Related
IES	IES	207	Plants and Civilization	Examines the structure, function, ecology, and diversity of plants, their importance to human civilization, and the impact of societal decisions regarding their use and exploitation.	2.7	UG	Sustainability Related
IES	IES	274	Chemistry of the Environment	Introduction to chemical principles in the natural and altered environment. This course covers the fundamentals of organic and inorganic chemistry in the context of the pressing environmental issues: air pollution, stratospheric ozone depletion, climate change, water pollution, and environmental contaminants	2. 2. 3. 5. 7	UG	Sustainability Related

IES	IES	302	PH Practice & Mgmt.	This course will provide an introduction to public health practices and cover management basics as applied to the public health field. The topics covered in the course will be examined through the lenses of prevention, social justice and the role of governmental public health. In Part I of the course, we will study basic public health concepts, core public health functions and practices, public health infrastructure at the local, state and federal levels, and the major areas of public health services and interventions. In Part II, we will cover management principles and functions such as planning, organizing, controlling and leading. We will apply these concepts to the administration of public health organizations	3.7	UG	Sustainability Related
IES	IES	303	Introduction to Epidemiology	Epidemiology is the study of the distribution and determinants of disease in populations and remains the basic science of public health. This methodology is unique to epidemiology, and in some cases, has even been appropriated by other fields. The objective of this course is to familiarize students with the range of tools used to conduct epidemiologic analysis, including design and measures of association. This course will be taught as an online course combined with an intensive interactive session with faculty and students one weekend in Spring.	3.7	UG	Sustainability Related
IES	IES	380	Intro. to GIS	Geographic Information Systems (GIS) is a mapping tool that allows users to create interactive searches, analyze spatial information, edit data and maps, and present the results visually. The course includes lecture, laboratory, and project components. Students will learn basic GIS skills and applications and work on projects with community organizations.	3.7	UG	Sustainability Related
IES	IES	381	Advanced GIS Applications	Students in this course will learn tools required to solve complex environmental problems and gain experience with spatial analysis, network analysis, 3-D analysis, GIS modeling, geostatistics, and other ArcGIS extensions. Students will also learn about internet-based mapping for dissemination of spatial data.	3.7	UG	Sustainability Related
IES	IES	387	Principles of Ecotoxicology	This course will provide information on how pollutants affect ecosystems and how we might ameliorate their negative effects in our world. The emphasis of this course will be the fate and effects of pollutants in the ecosystem. The effects will be from molecular level to individual organism, community, and ecosystem levels.	3.7	UG	Sustainability Related
IPSD	IPS	428	Intro to Spirituality Praxis	Investigation of the ministry of spiritual direction/accompaniment in a Christian context. Understanding spiritual direction/accompaniment as a particular form of mentoring and teaching, the course helps students to become critically aware of and explicitly articulate their working spiritual theology	4.7	G	Sustainability Related
IPSD	IPS	545	Christian Spirituality	Christian spirituality (the "lived experience of Christian faith") is a separate but partnered academic field with theology today. Key issues are: defining "spirituality", methods in the field, spirituality vs. institutional religion, Jesus Christ (christology), major figures and movements in Christian spirituality's 2000 year history, and classical and contemporary themes	5.7	G	Sustainability Related
IPSD	IPS	553	Moral Theo & Christian Ethics	This course focuses primarily on methods in ethics. Students will become familiar with the tradition of Catholic moral theology as well as different contemporary methodologies in ethics. Particular attention will be given to the history of the discipline, the role of scripture in moral reasoning, and Catholic social teaching	4.6	G	Sustainability Related
ISSCM	BUS	241	Business Statistics	This course examines the steps and procedures required to solve problems in science, social science, and business where data are useful - from the definition of the managerial problems to the use of statistical analysis to address these problems	1.2	UG	Sustainability Related
ISSCM	BUS	349	Project Management	The art and science of project management as applied to business, industrial, and public projects. Covers: the project life-cycle; project teambuilding; techniques for planning, scheduling and controlling projects; project organizations; project leadership and stakeholders.	7	UG	Sustainability Related
ISSCM	BUS	491	Managerial Statistics	The fundamentals of managerial statistics are presented. Topics may include descriptive statistics, random variables, probability distributions, estimation, hypothesis testing, regression, and correlation analysis. Statistical software is used to assist in the analysis of these problems	1.2	G	Sustainability Related
LAWD	LAW	162	Torts	basic course in the substantive law governing compensation for injuries to property and to the person. Considered are intentional wrongs, negligence, malpractice, products liability and strict liability; invasions of personal integrity and emotional well-being; injury to tangible and intangible rights in property; liability insurance and alternatives; and damages. Other risk-bearing alternatives are considered and contrasted with the traditional common law theories.	3	UG	Sustainability Related
LAWD	LAW	350	Land Use	This course explores land use controls such as zoning and subdivision regulations as exercised by local and state governmental units. The course analyzes the history of land use controls and explores topics such as flexibility and discretion, improper influence and corruption, alternative land use control schemes, suburban zoning and racial/economic exclusion, environmental protection by land use schemes, and growth control. In the process of exploring land use controls, the course analyzes the local institutions and procedures, constitutional issues, and the question of when an improper taking of property occurs in our legal system.	3.7	UG	Sustainability Related
LAWD	LAW	730	Government Hlth Policy I	<i>description not available in LOCUS</i>	3	G	Sustainability Related
LAWD	LAW	768	Topics in Long Term Care	Provides students with an overview of key legal and policy issues in the diverse and growing field of long term care. In the context of the seminar long term care will be cast broadly as an area that deals with diverse populations that have profound and ongoing health/social needs including disabled populations and the elderly. While much of the course will focus on statutory and regulatory law, significant emphasis will be placed on evolving public policies in long term care that impact programmatic developments in quality assurance, insurance coverage and the regulation of institutional and community actors. Specific areas of focus will be selected for each term for review and analyses including diseases of aging, prevention of abuse and neglect, uses of telehealth, senior housing policy and end of life care. Materials from the United States, Canada, the EU and Japan will be referenced. Students will be required to write two memoranda and participate in a group project.	3	G	Sustainability Related
LAWD	LAW	917	Public Health and the Law	<i>description not available in LOCUS</i>	3	G	Sustainability Related
MARK	BUS	310	Consumer Behavior	This course develops an understanding of how consumers behave before, during and after the consumption process through a discussion of cultural, social and perceptual factors	3.4	UG	Sustainability Related
MARK	BUS	390	Marketing Strategies	This capstone course develops an understanding of all marketing decisions involved in planning marketing strategies	3.7	UG	Sustainability Related
MATH	CAS	103	Fundmntl Statistics	This course provides an introduction to statistical reasoning and techniques in descriptive and inferential statistics and their applications in economics, education, genetics, medicine, physics, political science, and psychology. Not open to students who have completed ISOM 241	1.7	UG	Sustainability Related
MDLG	CAS	104	German IV	his course focuses on review and practice of more complex grammatical elements. Students will read texts of greater length and complexity, expand their vocabulary, and increase their ability to communicate, both orally and in writing.	1.7	UG	Sustainability Related
MDLG	CAS	365	Latin American Cinema	This course will focus on Latin American cinema, from its early beginnings in silent cinema to the present. Instructor's consent required to enroll.	6.7	UG	Sustainability Related

				Analyzes salient themes and formal features of twentieth-century novel.			
MDLG	CAS	480	Hispanic-American Novel			7 G	Sustainability Related
MGMT	BUS	401B	Innovative Corp Social Respons	This course will analyze why and how global businesses are innovating to address corporate responsibility expectations. The course will focus on companies that are co-creating value and will examine impacts from businesses, civil society and public policy that enhance (or detract from) competitiveness		3.7 G	Sustainability Related
MGMT	BUS	402B	Social Enterprise	Social enterprise seeks to create ventures that provide critical social services in innovative ways using the concepts and methods of business. This course aims to prepare students to engage in social enterprise by focusing on how to create social value by business means; how to start and sustain an entrepreneurial social venture; how to scale social innovation and grow an organization; how to obtain funding and generate earned revenue; how to adopt an appropriate legal governance structure and tax status; and how to measure, document, and communicate social impact		4.7 G	Sustainability Related
MGMT	BUS	403B	Creating Ethical Work Environ	This course will explore how companies create and sustain ethical work environments and challenge students to systematically think about ethical dilemmas in human resources. The course will explore ethical practice across four areas of human resources: 1) acquiring employees (employment planning, recruitment, and selection); 2) developing employees (training, mentoring, performance feedback); 3) rewarding employees (salary, incentives, benefits); and 4) managing employment relations (unions, safety). The course will include an emphasis across these areas on diversity, inclusion, and social responsibility.		3.7 G	Sustainability Related
MIIM	GMED	442	Cell&Molecular Immunology	<i>description not available in LOCUS</i>		7 G	Sustainability Related
PBHS	HSPH	306	Critical Thinking in PUBH	his course is designed to prepare students to make reasoned, intelligent decisions about public health matters by learning about and practicing how to think, read, write, and speak critically		3.7 UG	Sustainability Related
PHIL	CAS	130	Philosophy & Persons	<i>description not available in LOCUS</i>		6 UG	Related
PHYS	CAS	111	College Physics I Lec/Dis	Non-calculus introduction to vectors, kinematics, Newtonian mechanics of translational, rotational, and oscillatory motion, energy and momentum conservation, and thermodynamics		3.7 UG	Sustainability Related
PHYS	CAS	111L	College Physics Lab I	Non-calculus introduction to vectors, kinematics, Newtonian mechanics of translational, rotational, and oscillatory motion, energy and momentum conservation, and thermodynamics		3.7 UG	Sustainability Related
PHYS	CAS	112	Coll Physics II Lec/Disc	Physics 111 and 112 provide a non-calculus introduction to physics. Topics include electricity and magnetism, sound, optics, and selected topics from modern physics		3.7 UG	Sustainability Related
PHYS	CAS	112L	College Physics Lab II	Physics 111 and 112 provide a non-calculus introduction to physics. Topics include electricity and magnetism, sound, optics, and selected topics from modern physics		3.7 UG	Sustainability Related
PLSC	CAS	390	Urban Politics	Political processes in cities and other local governments. Examination of mayors, city councils, bureaucrats, and their interaction with local citizens and interest groups.		3.7 UG	Sustainability Related
PSYC	CAS	474	Rsrch in Group Dynamics	Covers theory, methods, and research on behavior in and by groups from a social psychological perspective. Learning outcomes include knowledge of theory and research on group structure, group performance, group decision making, negotiation, and intergroup behavior; ability to design research about group behavior and to analyze data from group research		4.7 G	Sustainability Related
SOCD	SOC	103	Bus & Profes Speaking	This class examines the theory and practice of audience analysis, message design, and oral presentation for professional speakers, with an emphasis on communication in organizational settings.		7 UG	Sustainability Related
SOCD	SOC	135	Intro Video Production	This course is a hands-on introduction to video field production. By designing and executing a series of short, creative production projects of varied forms, students explore how video techniques are used to structure meaning in media messages.		7 UG	Sustainability Related
SOCD	SOC	402	Org Ldrshp & Change Mgmt	Students will examine best practices in organizational leadership and change management. Students will also be introduced to major economic, financial and business principles and the terms, concepts and values that guide organizations. Finally, will gain insights that will enable them to work more effectively as communicators and organizational leaders		4.7 G	Sustainability Related
SOCL	CAS	125	Chgo-Gwrth of Metropolis	This course explores the development of Chicago metropolitan region from the 1830's to the present day. Students will explore the urban area not only through texts, but also through fieldwork		1.7 UG	Sustainability Related
SOCL	CAS	127	Socl Analysis-Socl Action	This course helps students who are volunteering at local congregations and agencies better understand the communities and issues they will encounter in Chicago. It emphasizes the analysis of "social solutions" to social problems as well as personal reflection and action.		1.7 UG	Sustainability Related
SOCL	CAS	281	Current Issues in Med Ed	This class is an opportunity to examine selected reform and innovation movements facing health professional education and training. Sophomore standing or above is required		2.7 UG	Sustainability Related
SOCL	CAS	365	Social Theory&Socl Rsrch	<i>description not available in LOCUS</i>		3.7 UG	Sustainability Related
SOWK	SSW	509	Community Intervention	In this capstone course, each student designs and conducts an empirical research project resulting in a senior research paper.		7 G	Sustainability Related
SOWK	SSW	626	Social Work/ Mentally Ill	This course offers students the chance to learn about leading-edge social work approaches providing humane care for severely mentally ill clients, especially those clients with concomitant substance abuse, developmental disabilities, and severe socioeconomic disadvantage. Working with the client's environment, collaboration with other systems, advocacy and program development are considered.		2.7 G	Sustainability Related
SOWK	SSW	732	Migration, Social Justice, HR	This course offers an exploration into some of the social justice concerns associated with contemporary migration and addresses distinct theories. The conditions that fuel migration issues and marginalize many migrants once in the U.S., raise a number of social, economic, and cultural challenges, and a myriad of ethical dilemmas.		2.6 G	Sustainability Related
SPS	SPS	349	Project Management	<i>description not available in LOCUS</i>		6 UG	Sustainability Related
SPS	SPS	380	Ldrshp, Cult and Ethics	<i>description not available in LOCUS</i>		2.6 UG	Sustainability Related
THEO	CAS	107	Intro to Religious Studies	This course is an introduction to the contemporary field of religious studies, focusing on both the theoretical investigations of religious traditions, as well as on the study of selected religious texts and practices (such as creation stories, sacred biographies, sacred scriptures of a religious tradition(s) rituals, ritual taboos, religiously motivated behaviors.		7 UG	Sustainability Related
THEO	CAS	190	Loyola's Mission: THEO	The course introduces students to LUC's mission through theological reflection on the main themes of the Transformative Education mission-statement: spirituality and faith, interlinked human knowing, moral compass, civic and environmental responsibility.		3.6 UG	Sustainability Related

THEO	CAS	203	Social Justice & Injustice	The course introduces students to Catholic and Protestant approaches to social justice. Students will also study theories and analyses of social injustice. Students will study specific instances of social injustice (gender, race, and class). It will increase student awareness of diversity, in the United States and globally.	2 UG	Sustainability Related
THEO	CAS	231	Hebrew Bible/Old Testament	This course provides an introduction to the Old Testament / Tanakh (Hebrew Scriptures).	3 UG	Sustainability Related
THEO	CAS	276	Black World Religion	This course explores the revelatory manner in which the divine comes to unique presence and expression among African peoples throughout human history. It will examine the religious experiences and traditions of Africa's ancient Nile valley civilizations, long recognized as cradling the world's spiritual and philosophical wisdom and as influencing the formative development of Judaism, Christianity, and Islam.	6, 7 UG	Sustainability Related
TLSC	EDUC	231	Sci & Writing in Elem Grades	This course introduces candidates (students) to the discipline and culture of science; provides experiences that engage candidates in the teaching and learning of science across varied school and non-school contexts; develops knowledge and skills to teach science through an inquiry approach and integrate writing	7 UG	Sustainability Related
UAPP	CAS	412	Urban Politics and Policy	<i>description not available in LOCUS</i>	1, 7 G	Sustainability Related
WOST	CAS	480	Queer Theory	This graduate level course maps the field of queer theory from an interdisciplinary perspective in order to cover a wide range of theoretical and disciplinary approaches and interpretive applications.	4 G	Sustainability Related
