

American University Sustainability Courses

(F) "Sustainability-focused" courses concentrate on the concept of sustainability, including its social, economic, and environmental dimensions, or examine an issue or topic using sustainability as a lens.

(R) "Sustainability-related" courses incorporate sustainability as a distinct course component or module, or concentrate on a single sustainability principle or issue.

A survey conducted by the Office of Sustainability in January, 2011 found that 213 courses offered during calendar year 2010 at American University were sustainability focused and 572 were sustainability related.
