

**University of Manitoba**  
**Guidelines for On-Site Pesticide Treatment Notices**

The Physical Plant Department will respect the following guidelines for all pesticide applications to turf and sports fields:

Notices will:

- Be posted at the site of application at least 24 hrs before the pesticide is applied; and,
- Remain posted for at least 48 hrs following the pesticide application.

Notices will contain the following information:

- Date of treatment;
- Common name of pesticide used;
- Recommended unprotected re-entry time (if applicable); and,
- Contact information.

Notices will be placed:

- In high visibility locations where they can be seen both from inside and outside of the treated area;
- At the beginning and end of the treated area and at 20m intervals along the perimeter of the treatment area.
