

LAWRENCE UNIVERSITY  
APPLETON, WISCONSIN

August 27, 2019

Meghan Fay Zahniser  
Executive Director  
Association for the Advancement of Sustainability in Higher Education  
2401 Walnut Street  
Suite 102  
Philadelphia, PA 19103

Dear Ms. Zahniser,

Lawrence University is pleased to submit its STARS data for 2017/18. Our work to build a strategic plan that focuses on our campus operations, along with our curricular and co-curricular offerings, is helping us to transform our campus into a living, learning laboratory. We believe that the data submitted accurately reflects the information and initiatives pertinent to our submission.

Over the past two years Lawrence has rebranded its sustainability efforts and has been working to foster a culture of sustainability on campus. We have embarked on a process of drafting a strategic plan for sustainability that has two parts; operations and engagement. It is Lawrence's mission to prepare students for lives of achievement and responsible and meaningful citizenship. We recognize our role as a university in preparing our students to be leaders in creating an environmentally and socially sustainable future.

We were pleased to be recognized as one of the top 10 performers for Wellbeing and Work in AASHE's 2019 Campus Sustainability Index. We hope to continue to lead by example, as well as take lead from others, to make colleges and universities leaders in developing a sustainable future.

Yours truly,

Christopher Lee  
Vice President for Finance and Administration
