RE: Letter of Affirmation-Innovation Credit: Effects of Climate Change on Environmental Exposures in local communities of Indianapolis, IN

Oct 18, 2016

Dear AASHE,

My name is Yi Wang, Assistant Professor of Environmental Health, and I have reviewed the Effects of Climate Change on Environmental Exposures in local communities of Indianapolis.

This work informs the needs of creating areas at lower risk of effects of climate change so the communities especially low-income ones are well prepared for the synerstic effects of climate change and environmental exposures.

I affirm that this new work is innovative and that it meets the AASEH STARS 2.0 criteria for an Innovative credit.

Thank you for your consideration!

Sincerely,

Yi Wang, PhD
Assistant Professor, Department of Environmental Health Sciences
