

# SUSTAINABILITY ACROSS THE CURRICULUM WORKSHOP

Facilitated By: Dr. Geoffrey Chase

Faculty members of Cal Poly Humboldt who are planning to include sustainability content in an existing course or develop a new course module with a sustainability focus are encouraged to participate. Other CSU sustainability coordinators, analysts and staff are invited to participate in the workshop as well, to learn how to facilitate their own workshop with their faculty on their campus.

Participants are expected to attend both days of the two-day workshop.  
Continental breakfast and lunch will be served.

## Agenda

This workshop will be divided through two days. This in-person workshop is designed to infuse sustainability across the curriculum.

Faculty will engage in several different kinds of activities.  
Such as:

- Small group discussions, reflections & planning between faculty & staff from around the state
- Brief presentations from Local Resource Experts
- Opportunities to spend some time in a natural setting
- Adapt the [Ponderosa Project from Northern Arizona University](#) into a model for their own campus

Readings and organizational materials will be provided.

## How to apply

Online application is required and early application is recommended

[Applications](#) accepted until December 10, 2022, or until space is filled; limited to approximately **30 participants**

Two weeks after application and prior to the workshop participants will receive a reading list and event logistics

## Dr. Geoffrey Chase

- Provost at CSU Channel Islands
- Dean of Undergraduate Studies
- Director of the Center for Regional Sustainability at San Diego State University
- Vice President of the WASC Senior College and University Commission (WSCUC)

At San Diego State, he played key roles in establishing the Weber University Honors College, the Center for Regional Sustainability, and programs supporting undergraduate research, assessment of student learning, academic scholarships, community-based service learning, and faculty development aimed at increasing student completion, success, and achievement.

He lectures widely on improving graduation rates, sustainability in higher education and offers workshops on institutional change, leadership, and sustainability.
