To whom it may concern:

This letter attests **PowerSave Campus** as an innovation at California State University, Fullerton (CSUF). PowerSave Campus is funded through the Alliance to Save Energy, a partnership with the utility agencies. PowerSave Campus is an energy efficiency education program that promotes careers in the field, contributes to actual energy savings, increases awareness of the importance of saving energy, and endorses academic infusion of sustainability concepts.

PowerSave Campus interns at CSUF work closely with faculty, staff, administrators, and students. CSUF PowerSave emphasizes four main pillars when prioritizing projects for campus.

1. Outreach and Education ignites the conversation through green festivals, tabling events, monthly campus newsletters, and other promotional outreach materials to connect with educate on energy efficiency.
2. Academic Infusion implements energy efficient methodology and strategies in student curriculum, allowing for energy efficiency awareness to spread into the minds of our intelligent and diverse campus communities.
3. Green Workforce Development highlights the expected growth of sustainable living and work environments.
4. Measurable Energy Savings involve auditing and research, educational campaigns, retrofitting, and implementing energy efficiency best practices.

This student-driven program works on projects that range from but are not limited to: energy audits and assessments; residential and laboratory energy competitions; intern-led and faculty sponsored academic courses; green career fairs; and energy efficient retrofits around campus.

Respectfully,

Willem van der Pol, Interim Associate Vice President, Facilities Management
