RE: Humber College STARS Report Submission 2023

Dear Sir/Madam,

It is my pleasure to submit Humber College's fourth Sustainability Tracking, Assessment & Rating System (STARS) submission for 2023 to the Association for Advancement of Sustainability in Higher Education (AASHE). This submission represents the work of numerous staff, faculty and students from across our institution.

With every STARS submission, Humber reaffirms its commitment to the reduction of environmental impacts, as well as to the creation of a more sustainable, equitable, diverse and inclusive campus community. Supported by our Office of Sustainability, Humber College strives not only to meet established sustainability benchmarks but to participate in the creation of new and innovative approaches to environmental stewardship on campus.

STARS continues to be an invaluable guide on this journey through the provision of best practice, and through its role in connecting us to other colleges and universities who share a desire to learn, grow, and advance together.

It is thanks to this guidance that we have improved our fourth STARS submission and with this update we have a stronger understanding of where we excel, and where we can further push boundaries.

I affirm the information of our 2023 STARS submission is an accurate reflection of Humber College's current sustainability performance.

Sincerely,

A handwritten signature in cursive script that reads 'Anne Marie Vaughan'.

Anne Marie Vaughan, Ed.D.
President and CEO
Humber College
