RE: Humber College STARS Report Submission 2019

Dear Sir/Madam,

It is my pleasure to submit Humber College's third Sustainability Tracking, Assessment & Rating System (STARS) submission for 2019 to the Association for Advancement of Sustainability in Higher Education. This submission has been the collective work of a large group of Humber staff, faculty, and students.

With the efforts of our Office of Sustainability initiating sustainability programs throughout the campus community, we are able to continuously increase our sustainability goals. We are committed to becoming a national leader in developing sustainable campuses through: 1) Campus Culture, 2) Teaching, Learning and Applied Research, 3) Sustainable Operations.

STARS has been a strong driver to help us on this journey, providing best practices and the ability to benchmark against other colleges and universities. We have improved since our last submission and with this update we have a stronger understanding of where we excel, and where we can further advance.

I affirm the information of our 2019 STARS submission is an accurate reflection of Humber College's current sustainability performance.

Sincerely,

Chris Whitaker
