RE: Humber College STARS Report Submission 2016

Dear Sir/Madam,

It is my pleasure to submit Humber College's second Sustainability Tracking, Assessment & Rating System (STARS) submission for 2016 to the Association for Advancement of Sustainability in Higher Education (AASHE). This submission has been the collective work of a large group of Humber staff, faculty and students.

Every day we continue the journey towards our vision to "be sustainable in everything we do" and we are proud of all the accomplishments and change we have seen in our operations, academics, engagement and planning and administration.

There has been a noticeable shift in recent years from our Office of Sustainability staff initiating sustainability programs to the campus community often leading the integration of sustainability across campus. This shift, along with regularly measuring the success of our programs and initiatives is how we know we are accomplishing our sustainability goals.

STARS has been a strong driver to help us on this journey, providing best practice and the ability to benchmark against other colleges and universities. We have improved since our first submission and with this update we now have a renewed understanding of where we excel, and where we can further advance.

I affirm the information of our 2016 STARS submission is an accurate reflection of Humber College's current sustainability performance.

Sincerely,

Chris Whitaker
