

FYE Sustainability Literacy Quiz & Assessment Rubric

(given in class before SL Lesson [pre] and end of the semester with final [post])

1. List the 3 legs of sustainability.
2. Define sustainability literacy in 1 or 2 sentences.
3. Describe how systems thinking can address a 21st Century problem? (Please Be Specific)
4. What is something you can do as an individual to be more sustainable in your daily life?
(Please be sure to explain how this is connected to the Triple Bottom Line)
5. Is sustainability important to you (i.e., life/career goals)?
6. Given your answer to #5, briefly explain your answer.

	0	1	2	3
Three Legs of Sustainability	None of the legs are listed	1 of the legs is listed	2 of the legs are listed	All 3 of the legs are listed
Sustainability Literacy	Describes 0 of the 3 components of the definition (TBL, knowledge/skills OR advocacy)	Describes 1 of the 3 components of the definition (TBL, knowledge/skills OR advocacy)	Describes 2 of the 3 components of the definition (TBL, knowledge/skills OR advocacy)	Describes all 3 of components of the definition (TBL, knowledge/skills OR advocacy)
Systems Thinking	No description of the TBL, systems thinking, OR 21st century problems	Describes a 21st century problem OR systems thinking	Minimally describes a 21st century problem AND how systems thinking can be used to address it	Completely describes a 21st century problem AND how systems thinking can be used to address it
Action	No action is suggested	Action suggested	Action suggested AND minimal description of how it relates to the TBL	Action suggested AND complete description of how it relates to the TBL

Session : Spring 2019 Pre Quiz

User name : Roof Karin

Module : CORE International

Global results

Module / Theme	Number of questions
CORE International	30
Knowledge - Sustainable humanity and ecosystems	10
Knowledge - Global and local human-constructed systems	8
Knowledge - Transition towards sustainability	8
Knowledge - Role to play, individual & systemic change	4

1 The scores are calculated as follows: 4 points for the expected answer; 1 point for \\

2 The % represents the percentage of expected answers

Question

In November 2001, the General Conference of UNESCO adopted the Universal Declaration on Cultural Diversity. Which of the following is NOT a correct description of the declaration?

What is the most widely used definition of sustainable development (resulting from the Brundtland Report in 1987)?

According to UNESCO, Education for Sustainable Development (ESD) enables everyone to acquire the knowledge, skills, attitudes and values necessary to address the challenges of sustainable development.

There are 6,000 languages currently spoken in the world. How many of them will disappear by the end of the century if no action is taken?

In 1995, a multinational carpet manufacturer set up a proactive policy aimed at achieving "zero impact". The company's goal was to reduce its environmental impact to zero by 2010.

Hunger remains one of the most pressing development challenges. Several initiatives are attempting to reduce the loss and waste of food.

Which of the following statements is NOT a correct description of Fair Trade?

How has the average proportion of women in parliament changed over the last 20 years in the 174 countries with reliable data?

According to the definition of the UN Global Compact, a social entrepreneur is defined as someone capable of:

Which of the following is a common framework used by companies and other organizations to communicate with their stakeholders?

To understand how change is created, psychological science identifies "contagious behavior," defined as the unconscious spread of behaviors and emotions.

Greenhouse gases are enhancing climate change as assessed since 1988 by the IPCC (Intergovernmental Panel on Climate Change).

Among the 1.3 billion km³ of water on earth, about 2.5% or 35 million km³ is freshwater. Water is abundant – but nevertheless scarce.

Renewable energy is defined as "Energy derived from natural sources that are replenished at a faster rate than they are consumed."

Even though renewable energy represents approximately half of newly created power generation capacity in 2014, its global contribution to total energy supply is only 18%.

The number of out-of-school primary age children fell from 100 million in 2000 to 60 million in 2014 whereas world population increased from 6 billion to 7.4 billion.

In 2000, the number of out-of-school children and youth (including primary age, lower and upper secondary ages) was approximately 100 million.

Worldwide waste quantities are constantly increasing. Developed countries still account for 50% of total world wide waste.

In order to face climate change, policies can both target mitigation (which means trying to reduce the cause) and adaptation (which means trying to reduce the damage).

"Earth Overshoot Day" is the calculated calendar date on which the current world population has consumed more resources than Earth can regenerate in that year.

"Carrying capacity" is the capacity of a system to support a population indefinitely with its resources. Currently the planet is exceeding its carrying capacity.

In the last 25 years, human life expectancy in the world has increased by an average of 6 years, even though large differences exist between countries.

Keeping the temperatures in a moderate range is vital for life on earth. In this complex process, oceans are playing a key role.

What is the meaning of the principle of accountability in a sustainability context?

According to the ILO (International Labor Organization), 215 million children (5-17 years old) were affected by child labour in 2012.

The International Energy Agency (IEA) evaluates every year the global carbon dioxide emissions and compares their growth with the world population.

According to American Psychological Association (APA), resilience "is the process of adapting well in the face of adversity, trauma, tragedy, or threats to life."

Universal health coverage is considered as "one of the most powerful social equalizers among all [health] policy options."

In the end of 2000s, a group of 26 scientists led by Johan Rockström (Stockholm University) identified 9 planetary boundaries.

Anthropocene is a recently coined term referring to a new geologic time which began in 1950s. According to scientists, it is the most significant change in Earth's history since the beginning of the Holocene.

Subject

Humanity: Individual human needs, diversity, social fabric, cultures, local and global world, etc.

Sustainability: Definition of Sustainability / Sustainable development

Within local and global social structures and governance, zooms on: Education, and Culture

Within local and global social structures and governance, zooms on: Education, and Culture

Examples and ideas we can learn from: case studies of successes or failures; technological, strategic, or social innovations

Within local and global economic system, zooms on: Water, Energy, and Food

Local and global economic systems: paradigms; positive results negative impacts; production, distribution, consumption

Local and global social structures and governance: paradigms; positive results negative impacts; laws; how organisations work

Examples and ideas we can learn from: case studies of successes or failures; technological, strategic, or social innovations

Initiatives towards sustainability... more from institution / international level (like UN MDGs, Global Compact, GIEC, GRI, ISO 26000)

How does one efficiently act to create both individual and system change... whoever one is (individual, organisation, south, north, etc.)

Ecosystems: Biosphere, global and local ecosystems, interdependent and diverse community of life, life supporting cycles, services

Ecological perspective: where are we at, and why sustainability is both an urgency and an opportunity

Within local and global economic system, zooms on: Water, Energy, and Food

How to start, reinforce, accelerate systems change

Social perspective: where are we at (demography, (in)equalities, gender equality, education, ?), and sustainability being an urgency

Social perspective: where are we at (demography, (in)equalities, gender equality, education, ?), and sustainability being an urgency

Local and global economic systems: paradigms; positive results negative impacts; production, distribution, consumption

How does one efficiently act to create both individual and system change... whoever one is (individual, organisation, south, north, etc.)

Concepts, tools, frameworks... more from individual NGOs or smaller networks (like Cradle to Cradle, Natural Capitalism, etc.)

How does one become aware of his own roles and impacts... whoever one is (individual, organisation, south, north, etc.)

Social perspective: where are we at (demography, (in)equalities, gender equality, education, ?), and sustainability being an urgency

Ecological perspective: where are we at, and why sustainability is both an urgency and an opportunity

Sustainability: Definition of Sustainability / Sustainable development

Local and global social structures and governance: paradigms; positive results negative impacts; laws; how organisations work

How to start, reinforce, accelerate systems change

Concepts, tools, frameworks... more from individual NGOs or smaller networks (like Cradle to Cradle, Natural Capitalism, etc.)

Initiatives towards sustainability... more from institution / international level (like UN MDGs, Global Compact, GIEC, GRI, ISO 26000)

Ecosystems: Biosphere, global and local ecosystems, interdependent and diverse community of life, life supporting cycles, services

How does one become aware of his own roles and impacts... whoever one is (individual, organisation, south, north, etc.)
