

# Energy Wise Network

## Engage everyone at your workplace in energy savings.

We're offering commercial customers access to the Energy Wise Network program in order to help engage people at your organization to save energy. In partnership with FortisBC, the program will provide you with training, networking opportunities, campaign toolkits, and customized coaching and incentive funding. This is a new offering in 2016, replacing the BC Hydro Workplace Conservation Awareness Program that ran from 2008 to 2016.

## The offer

The key features of the program include:

**Two training summits.** We'll host day-and-a-half-long training and idea-sharing sessions. You'll have opportunities to network with over 50 B.C. organizations working on similar programs and campaigns.

**Four webinars.** We'll also host four one-hour facilitated sessions on an engagement topic that will include opportunity for discussions.

**Campaign planning materials and toolkits.** We'll provide materials and templates that you can use to design custom energy saving campaigns at your business.

**Two options for customized support.** We'll provide either 20 coaching hours, or 10 coaching hours and \$1,000 incentive funding for campaign costs such as prizes, food, and printing.

We're working together to help B.C. save energy.

## Program schedule

The first round of the program will run from September 2016 to March 2017. The following calendar outlines key program dates and events.

Program	September	October	November	December	January	February	March
Activity	Webinar	Summit	Webinar		Summit	Webinar	Webinar
Reporting	First Report due						Final report due

## Requirements

One person from your organization must be designated to be the key contact and have time available to complete the following deliverables:

1. Submit two online reports (template will be provided).
2. Attend both training summits (October and January) in person.
3. Participate in at least three of the four webinars offered.

You'll be required to implement one to three campaigns by March 31, 2017. The number of campaigns required is determined by the applicant's score on the [Tier Assessment Tool](#) provided with the application form. Advanced Education and all Tier 3 participants must implement at least one natural gas focused campaign by March 31, 2017.

## Let's talk

To apply to be a part of the Energy Wise Network contact your Key Account Manager.
