

# BADGERS LIVE SUSTAINABLY.

## ENERGY

1. Turn off lights and unplug electronics when they're not in use. Better yet- use a power strip to turn all electronics off at once
2. Wash full loads of laundry, use cold cycles, and hang clothes up to dry
3. Bike, take the bus or carpool when you travel
4. Use energy efficient lighting – including CFLs and LEDs

## FOOD

1. Consume less meat and dairy products, try meatless Mondays!
2. Eat in season and buy local. Check out the farmers' market on the Capitol Square and community gardens on campus!
3. Skip processed and packaged food to reduce waste
4. Use reusable containers to transport your lunch and drinks

## WASTE

1. Avoid the landfill- reduce, reuse, and recycle to prevent waste
2. Donate unneeded clothing, books, and household items at Ogg, Dejope, College Library, or the Lutheran Campus Ministry
3. Buy secondhand items from the many thrift stores around Madison instead of purchasing new
4. Compost your food waste- compost bins are available in all residence hall trash/recycle rooms and most kitchens

## WATER

1. Shorten your shower and turn off the water while brushing your teeth or shaving
2. Refill your Housing reusable water bottle rather than buying bottled water
3. Submit maintenance reports (MARS) when you see leaky faucets, showerheads, and toilets
