

Quality Statement

Facilities supports Grant MacEwan University's mission by designing, building, maintaining and operating physical environments that are: secure, clean, functional, sustainable and inspiring through committed resources and technology. Using our Quality Management System as the framework, we contribute to creating a work environment that supports safety, health and wellness, both within our department and throughout the entire MacEwan community. We review our customer's needs and requirements with our employees to ensure that they are understood and being met. Through the measurement and analysis of data, management evaluates the effectiveness and suitability of our Quality Management System as part of our goal of continuous improvement.

A handwritten signature in black ink, appearing to read 'Stuart MacLean', with a long horizontal flourish extending to the right.

Stuart MacLean

Associate Vice President, Facilities.

October 18, 2012.
